EASTERN SIERRA
Sustainable Recreation Partnership

REGULAR PARTNER MEETING

September 8, 2025

EASTERN SIERRA
Sustainable Recreation Partnership

REGULAR PARTNER MEETING

September 8, 2025

Recording in Progress

Public lands in the United States hold the creation stories, burial grounds, and ceremonies of Indigenous people who were killed or forcibly removed from their ancestral homes during territorial acquisition.

Many tribes, comprised of different bands, live in the Eastern Sierra region, caring for their native lands as they coexist with the ongoing impacts of colonization. Past or present tribes and bands associated with the region that this effort is aware of include, but are not limited to, the Miwok, Mono Lake Kutzadika'a, Mono/Monache, Nüümü (Paiute), Newe (Shoshone), Timbi-Sha, Utu Utu Gwaitu Paiute, and Washoe.

Two Nüümü terms describe the region and provide important context to ideas offered in this presentation. The first is Pamidu Toiyabe (Western Mountains), and the other, more widely known, place name is Payahuunadü (The Place Where Water Flows).

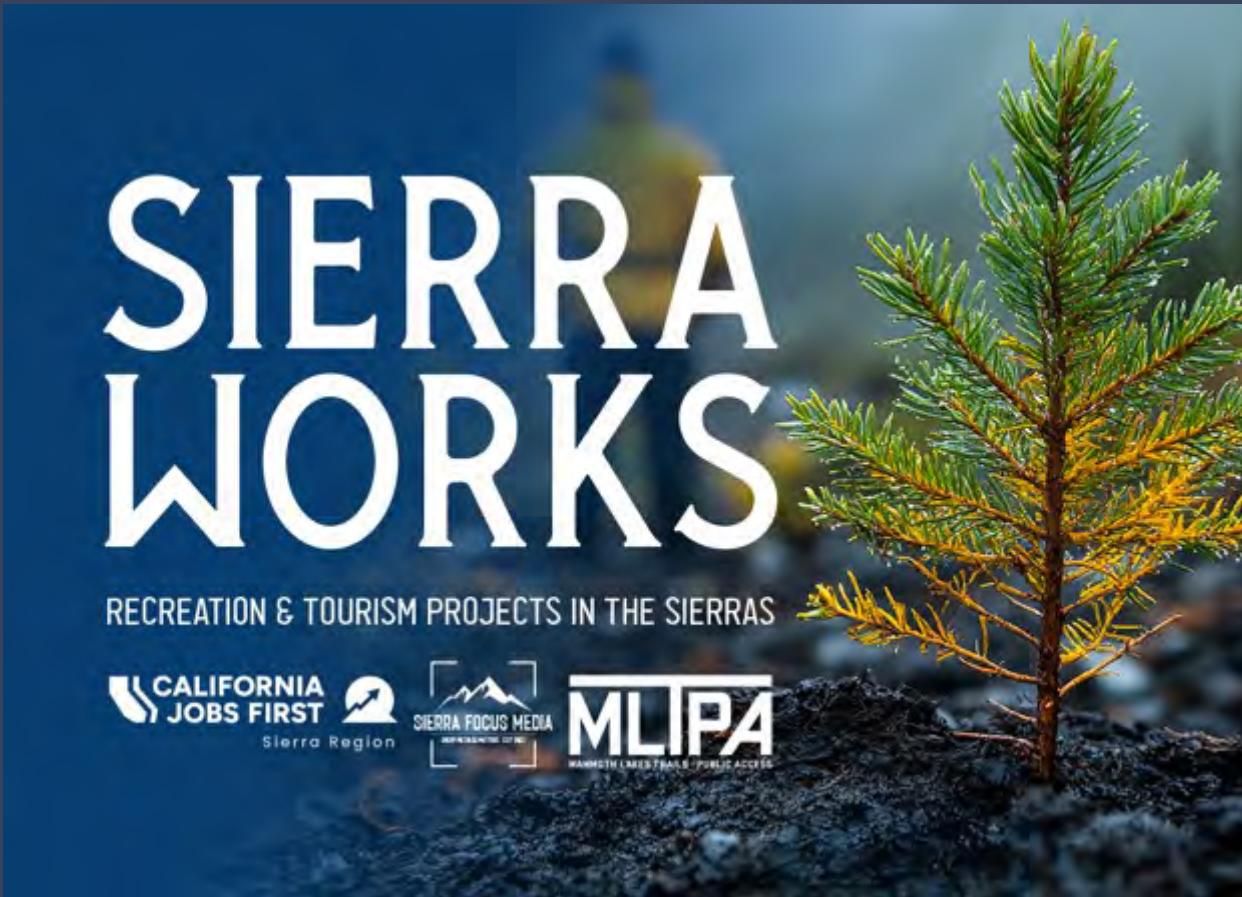

This acknowledgement is an invitation to all organizations, residents, and visitors to recognize the way this history has shaped the present as all parties work together in anticipation of a better future.

What is the ESSRP

"A public/public partnership between tribal, local, state, and federal government agencies and a regional voice for sustainable outdoor recreation in California."

Garnet Blows Up, and Making California Forestry More Wildfire Resilient.

September 7, 2025 by Zeké Lunder

The Garnet Fire has gobbled about 20 square miles in the past 12 hours. We'll catch you up on where this new growth is happening.

Also, a meandering conversation about the complicated world of California forestry, and the many economic obstacles of pivoting the industry to more wildfire resilient practices.

Lookout Livestream

AI Summary, edited by Zeke.

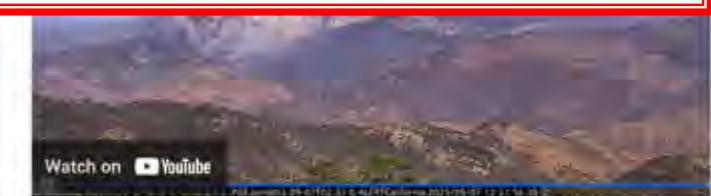

The Garnet fire in Fresno expanded by 20 square miles, crossing Dinkey Creek and threatening McKinley Grove. The fire is being driven by extreme fuel loading, inaccessible terrain, and long-range spotting. The fire's intensity is attributed to the lack of recent fire history, and heavy drought-induced tree mortality, which has left extremely loading of dead and down fuels. The fire's progression was monitored via Della and Fence Meadow cameras, and by IR mapping of the fire from the night of 9/6, an IR satellite image taken at noon on 9/7, and IR flights at 13:30 and 16:30 on 9/7.

Welcome and Housekeeping

A screenshot of a computer screen displaying a fire monitoring interface. It shows various data points such as '340°', '350°', '0°', '10°', '20°', and '30°'. The 'ALERTCalifornia' logo is visible on the left, and the 'UC San Diego' logo is in the center. The 'THE LOOKOUT IMAGE COURTESY OF PG&E' logo is prominently displayed at the top right of the interface.

Congress races to avoid government shutdown as partisan standoff deepens

PUBLISHED Wed, SEP 3 2014 11:49 PM EDT

Erin Doherty @ERINDOHERTY WATCH LIVE

KEY POINTS

- Lawmakers on Capitol Hill have less than four weeks to reach a deal to avoid a government shutdown at the end of September.
- Lawmakers will likely consider a stopgap measure to keep funding going for federal agencies, but even that could face hurdles, as Democrats in the Senate appear uneasy about voting with Republicans to help them clear the 60-vote threshold.
- The partisan blame game has already begun, with House Speaker Mike Johnson saying that a government shutdown would be because "congressional Democrats rejected common sense solutions to fund the government."

Senate Approps News

July 26, 2025 by Sharon

Public Lands

- The bill rejects President Trump's efforts to shortchange America's cherished landscapes and ensures that funding for operations of the National Park System, the National Wildlife Refuge System, National Conservation Lands, and the National Forest System is fully protected at enacted levels.
- The bill provides the funding necessary to maintain personnel at prior year levels and requires the necessary staffing levels to be able to provide visitor services, Tribal consultation, ensure public safety, and carry out the science necessary to respond to growing natural threats and increased visitation.

National Park Service

- The bill provides \$3.27 billion for the National Park Service, including \$2.87 billion for the operation of the National Park System, which is equal to the enacted level and is \$145 million above the level in House Republicans' bill and \$875 million higher than the level requested by President Trump.
- The bill provides the resources to sustain fiscal year 2024 staffing levels—rejecting staffing cuts made since January—and to support a full complement of seasonal staff during fiscal year 2026.
- The bill also provides \$168 million for the Historic Preservation Fund and protects all 433 national park units from being sold off or otherwise eliminated from the National Park System.

Forest Service

- The bill provides \$6.17 billion for the Forest Service, excluding additional funding for the Wildfire Suppression Operations Reserve.
- Of this amount, \$3.7 billion is provided for the Forest Service's non-wildland fire management responsibilities and provides sufficient funds to sustain appropriate staffing levels.
- The bill rejects the steep \$1.4 billion cuts to the Forest Service's non-fire budget proposed by President Trump.
- The bill provides funding for the Forest Service to improve forest restoration and fire risk reduction efforts on federal lands and through cross-boundary partnerships.
- It also provides \$175 million for hazardous fuels reduction projects, \$31 million for the Collaborative Forest Landscape Restoration Program, and \$6 million for the Legacy Roads and Trails program to prioritize fish passage improvements and repurposing unnecessary roads as trails.

Bob Gardner Updates – September 8, 2025

Federal Budget Status – September 30, 2025

- FY 2026 starts Oct. 1, 2025; if none of the 12 FY 2026 appropriations bills have been enacted, Federal Government shuts down (except for essential programs).
- Congress usually enacts a Continuing Resolution to avoid shutdowns, sometimes for a few days if appropriations bills are close to enactment, but more recently for a few months if there has been little progress in resolving bills between the House and Senate versions.
- Final appropriations action has ultimately been achieved using omnibus appropriations bills that contain several of the 12 separate bills; likely for FY 2026 similar to FY 2025.

CONTACT LEGISLATORS TO APPROVE PROP. 4 SPENDING PLAN

BY ACWA STAFF AUG 15, 2025 WATER NEWS

SACRAMENTO — ACWA is urging member agencies to sign a coalition letter and contact their legislators in support of a spending plan for Proposition 4, the \$10 billion climate resilience bond approved by voters last year.

The Legislature has delayed implementation of this critical funding despite shovel-ready projects waiting on funding to move forward. If a spending plan isn't approved by Sept. 12, it will be delayed until the 2026 Legislative Session.

Proposition 4 includes \$2.91 billion in funding for nine water-related categories. By law, the Legislature must approve a spending plan in order for state agencies to begin the grant solicitation process. Timely approval of a spending plan would recognize how this bond funding is a critical tool for public agencies to implement crucial projects in their communities. In some cases, delaying implementation of the funding could cause vital infrastructure projects to also be delayed.

An Aug. 14 ACWA [Legislative Alert](#) contains more information and a link for agencies to add their logo to an ACWA letter. Member login is required.

The special session shadow

By CAMILLE VON KAENEL | 09/04/2025 09:00 PM EDT

Presented by Climate Safe Infrastructure Coalition

CAP AND FRAYED: Lawmakers and Gov. **Gavin Newsom** came into the final stretch with a sweeping set of energy priorities, including reauthorizing the state's cap-and-trade program, shoring up the supply of crude oil to refineries, advancing a West-wide electricity grid and reupping a state fund for utilities on the hook for wildfire damages.

They may have bitten off more than they could chew.

Like every year, lawmakers have retreated to back-room negotiations and political horse-trading to finalize deals before their session runs out. This year, though, the players remain far apart on enough energy and climate issues that it's fueling speculation the negotiations will have to slip to a special session or next year.

With a week to go before the end of the regular session and just three working days before the deadline to have bill text in print, the Senate and the Assembly remain deadlocked over extending the state's signature climate policy, cap and trade. The program's billions of dollars in annual auction proceeds could smooth over disagreements and secure votes, like they did in 2017 — but the sides are too far apart for money to bridge the gap, legislative staffers and lobbyists said Thursday.

The fight is still over the very architecture of the program. While Assemblymember **Jacqui Irwin**'s proposal, out in draft form for the past two weeks, would reauthorize the existing market with some tweaks aimed at winning over moderate Democrats (reminder: this still needs a two-thirds vote), like increased use of carbon offsets and a reserve of permits to bolster declining auction revenues, the Senate is considering bigger changes.

Two people who've seen a detailed Senate framework said it would limit offsets and free allowances and lower the price ceiling of the program, similar to a 2017 bill that the Senate proposed last time the program was up for reauthorization, SB 775. That would create more certainty about the price to pollute.

But that version, often likened to a carbon tax, is a nonstarter with businesses, who prefer Newsom's proposal to reauthorize the program as-is. And some environmental groups bashed it

Final Reminder – Take Action Today for GGRF Reauthorization
To: undisclosed-recipients; Bcc: John Wentworth

RE: INRUM - Our Climate Future.org
3:00 AM

[Details](#)

Dear CWNRP Coalition Members,

Great news! The Greenhouse Gas Reduction Fund (GGRF) Bill has unanimously passed the Assembly Appropriations Committee vote and is undergoing negotiations. We now have one final push to ensure that Natural and Working Lands (NWL) receive dedicated funding for years to come. This is our last week to make our voices heard.

Please take action today by using the attached Media Toolkit, contacting your legislators, and sharing our message on social media. Your advocacy is crucial for California's Cap-and-Invest reauthorization through 2046 and for establishing sector-specific funding categories to direct cap-and-trade revenue investments.

Legislative decisions are being finalized now, so your outreach in these last days before the final floor votes on **September 12th** is critical to our success.

Thank you for your prompt action and steadfast commitment to California's climate stewardship.

Sincerely,
Sarah

Happenings of Interest

Toolkit: Support Reauthorization of the Greenhouse Gas Reduction Fund

Background and What We're Asking:

In late June, Governor Newsom signed California's FY 2025–26 budget — and for the first time in years, it included no allocations from the Greenhouse Gas Reduction Fund (GGRF). This signals the Legislature's intent to take up Cap-and-Trade program reauthorization as soon as this summer. The program, which funds the GGRF, is set to expire in 2030.

While the GGRF has historically supported clean energy and transportation, natural and working lands — like forests, wetlands, urban green spaces, farms, and state parks — are a new and critical climate solution. These landscapes could deliver up to 15% of the emissions reductions needed to meet California's 2045 carbon neutrality goals, but only with sustained funding.

We're urging state leaders to reauthorize Cap-and-Trade this year and commit GGRF investments in natural and working lands, directed annually to the California Natural Resources Agency and its departments — including State Parks, the Wildlife Conservation Board, Department of Conservation, Coastal Conservancy, and California Conservation Corps. These investments will drive nature-based solutions like wildfire resilience, habitat restoration, healthy soils, urban greening, and workforce development.

The Legislature is in summer recess through August 17, making this a critical moment to take action.

Here's what you can do today:

1. Email your state legislators urging them to reauthorize the GGRF and prioritize nature-based solutions.
2. Share the message on social media and tag your legislators to amplify the call for action.

How to Email Your Legislators:

Step 1: Find your representatives

Use this tool to locate your State Senator and Assemblymember:

→ <https://findyourlegislator.ca.gov>

Step 2: Copy and paste this sample message into your email

Subject: Support the Reauthorization of the Greenhouse Gas Reduction Fund (GGRF)

California's resilience to future climate-driven impacts depends on achieving the state's 2045 carbon neutrality goals. While billions of dollars have already been invested, those efforts alone won't get us across the finish line. We must do more.

The Greenhouse Gas Reduction Fund (GGRF) supports the essential programs that move us towards these climate targets, but it must be reauthorized to prevent its sunset in 2030.

Time is of the essence, and updates to the program are crucial.

California's natural and working lands — including forests, rangelands, wetlands, farms, grasslands, urban green spaces, and state parks — have the potential to contribute up to 15% of the total reductions

needed to meet California's goals. To accomplish this, GGRF investments in nature-based solutions must complement investments in the energy, transportation, and manufacturing sectors.

I urge you to direct GGRF funds annually to the California Natural Resources Agency and its departments — including the Department of Parks and Recreation, Wildlife Conservation Board, Department of Conservation, State Coastal Conservancy, and the California Conservation Corps. These investments are critical to building a climate-resilient California.

Sincerely,

[Your Name]
[Your City or Zip Code]

GREENWIRE

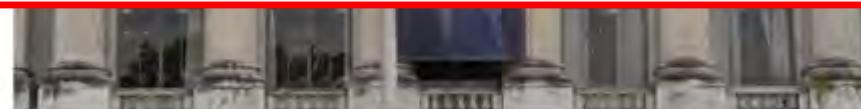

USDA bends to pressure, opens public comment on reorg plan

The secretive nature of the agency's plan has drawn criticism from both Democrats and Republicans in Congress, as well as from some policy groups.

BY: MARC HELLER | 08/04/2025 01:34 PM EDT

"All stakeholders, including USDA employees, members of Congress, and agricultural and nutrition partners, are encouraged to provide feedback by emailing reorganization@usda.gov. The comment period is open through August 26, 2025."

A banner with a photograph of President Donald Trump hangs over the entrance of the Department of Agriculture building in Washington on May 16. [Jose Luis Magana/AP]

GREENWIRE | The Agriculture Department gave way to pressure and announced it will take public comment on its abruptly announced plan to relocate most of its national capital region staff and close some facilities.

Although a public comment period wasn't initially part of the changes announced July 24, Agriculture Secretary Brooke Rollins said Friday that the agency wants feedback from the public, farm groups and lawmakers. The comment period will close Aug. 26.

"We value your perspective as we work to ensure that USDA is best positioned to serve America's farmers, ranchers, producers, and rural communities," Rollins said in a news release.

Forest Service to Abandon

POLITICO

USDA reorganization will move most of its Washington staff 'closer to' farmers

Agriculture Secretary Brooke Rollins is closing several D.C.-area buildings but notably will not pursue a large-scale reduction in force.

"The U.S. Forest Service will abandon its nine regional offices as its parent Department of Agriculture consolidates out of Washington, D.C., according to a memo released Thursday by Agriculture Secretary Brooke Rollins."

The U.S. Forest Service plans to phase out the nine regional offices across the country, including the Region I Headquarters in Missoula, Montana. Credit: Robert Chaney

The U.S. Forest Service will abandon its nine regional offices as its parent Department of Agriculture consolidates out of Washington, D.C., according to a memo released Thursday by Agriculture Secretary Brooke Rollins.

Agriculture (USDA), refocusing its core operations to better align with its founding mission of supporting American farming, ranching, and forestry.

Over the last four years, USDA's workforce grew by 8%, and employees' salaries increased by 14.5% - including hiring thousands of employees with no sustainable way to pay them. This all occurred without any tangible increase in service to USDA's core constituencies across the agricultural sector. USDA's footprint in the National Capital Region (NCR) is underutilized and redundant, plagued by rampant overspending and decades of mismanagement and costly deferred maintenance. President Trump has made it clear government needs to be scrutinized, and after this thorough review of USDA, the results show a bloated, expensive, and unsustainable organization.

E&E DAILY | National forests and wildfire will return to the congressional agenda this week with a pair of House subcommittee hearings on Forest Service programs.

The Trump administration's challenges in managing the 193-million-acre forest system with a sharply reduced workforce — and a big agency reorganization still to come — are likely topics for both the Agriculture and Natural Resources subcommittees.

In the Natural Resources hearing, the Subcommittee on Federal Lands will take testimony on the state of national forests, picking up on a hearing that was initially scheduled for July 9.

E&E DAILY | House Natural Resources Chair Bruce Westerman laid out his early targets for reworking the Great American Outdoors Act at a field hearing in Grand Teton National Park.

Westerman — who expressed strong support for reauthorizing the expiring law, which directed billions of dollars toward revitalizing America's public lands — has repeatedly said reform would be necessary to make a dent in the National Park Service's swollen deferred maintenance backlog. On Friday, he discussed more targeted spending and a new foreign visitor surcharge.

"Our task is twofold: first, to examine what worked and what didn't work under the first iteration of the law and, second, to chart a path forward that ensures our parks are modernized, accessible and ready to welcome visitors for our country's next 250 years," Westerman said. "Without important reforms, we

BLM Plans List Over 6 Million Acres for Potential Disposal

This spring, the outdoor recreation community was instrumental in convincing lawmakers to remove provisions from the 2025 budget reconciliation bill that would have led to large-scale public land sales. While it was a major victory, public lands can still be sold through other actions. As pressure mounts to develop the West's open spaces, some policymakers are considering public land parcels as opportunities to expand housing or develop for other purposes.

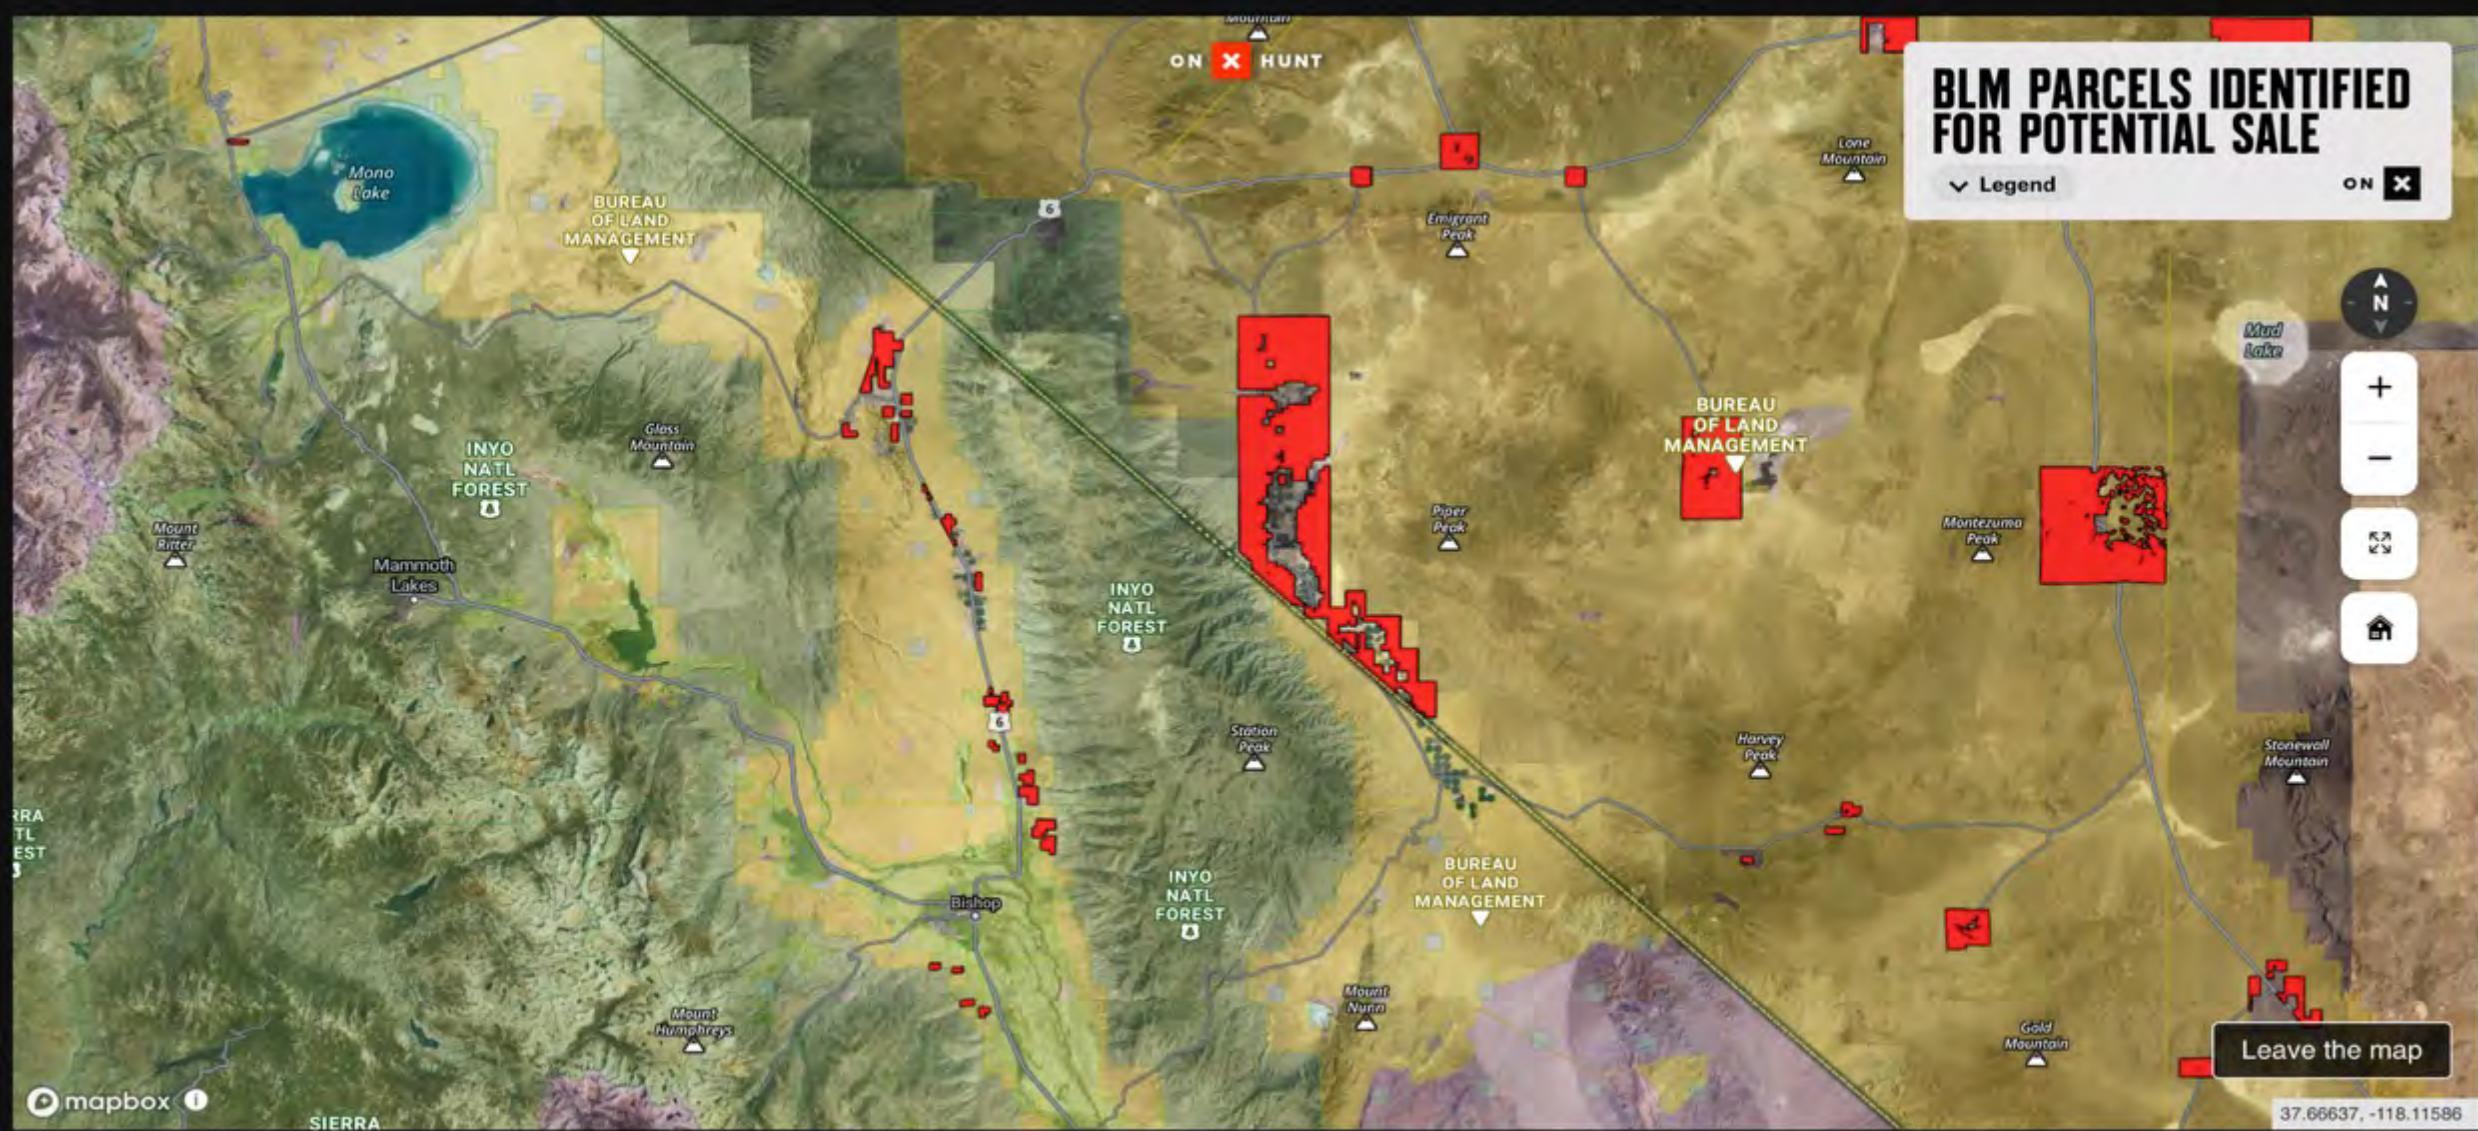

Specific parcels have been quietly flagged for potential sale—or “disposal”—for decades. The Bureau of Land Management (BLM) officially records these parcels in Resource Management Plans (RMPs), legal documents that guide long-term management decisions. Across more than 160 planning areas, at least **6,086,900 acres** are identified for potential sale in the Western United States.

While public input is part of the RMP process, in many cases the last time the public had an opportunity to weigh in on the value of these lands was decades ago. Over time, the priorities and needs of Western communities changed. Additionally, some BLM offices appear to have taken a more sweeping approach than others when listing lands for potential disposal, which—if carried out through sales—could result in an alarming loss of access in some areas.

To bring transparency to this information, onX and TRCP have created a first-of-its-kind, interactive map spanning Western BLM planning areas in the lower 48 states. This map provides necessary geographic context for where parcels that could be sold are distributed on the landscape, and includes roads, towns, and adjoining public lands. Prior to this map, finding information or data about flagged parcels required searching government databases and documents that are hundreds of pages long. Now it’s possible to see at a glance which parcels may be considered for sale.

[Sign Up for Updates](#)

This map contains parcels identified in RMPs across 17 Western states-plus a few outliers where data is otherwise sparse. The disposal data was sourced from the BLM, and we're aware that certain plans

Happenings of Interest

The West Has Changed Since Parcels Were Identified

Many BLM lands were identified for potential sale decades ago through resource management planning. Plan revisions sometimes failed to meaningfully review or reconsider the original lists of parcels, and simply carried the outdated list forward. The populations, economies, and needs of Western communities have changed significantly in recent decades, and these disposal lists should be revisited to better reflect current day realities.

Population Growth

In the last 40 years, the population of the 17 Western states has grown by approximately 78 million people, or more than a 200% increase.

From 2006-2022, the number of visits to BLM lands increased by 46%, according to Outdoor Alliance.

Land Development and Cultural Shifts

As the population has grown, large properties in the West have been subdivided and developed, in many cases cutting off access and leading to fewer people knowing their neighbors and having family ties to landowners on the periphery of towns. Public lands close to population centers are increasingly important access opportunities.

Modern Technology

Thanks to GPS technology, smartphones, digital maps, and a growing demand for outdoor experiences, many public land parcels identified by the BLM for potential sale are easier for the public to discover and safer to navigate. A desire to get off the beaten path is more common as population growth and development of previously open space squeeze recreation.

Roadless Rule Recision Buys Off Murkowski With Taxpayer-Funded Lumber Giveaway To China

But all it will achieve is to further break the forest service

WES SILER

JUN 25, 2025

On Monday, agriculture secretary Brooke Rollins announced plans to rescind the Roadless Rule, Clinton-era legislation that protects 58.5 million acres of public land managed by the forest service from development. Where did this come from and why is it happening now? Well, Senator Lisa Murkowski (R-Alaska), who's making a lot of noise about potentially voting against the budget reconciliation package, has been trying to use federal funds to sell old-growth timber from her state's rainforests to China for decades, and the Roadless Rule is in her way. But like most Trump administration efforts, incompetence may derail their attempt to enable her to do that.

WES SILER'S NEWSLETTER

Stop Freaking Out About The Forest Service Roadless Rule

Destroying our nation's last wild places isn't just evil, it also requires competence

WES SILER

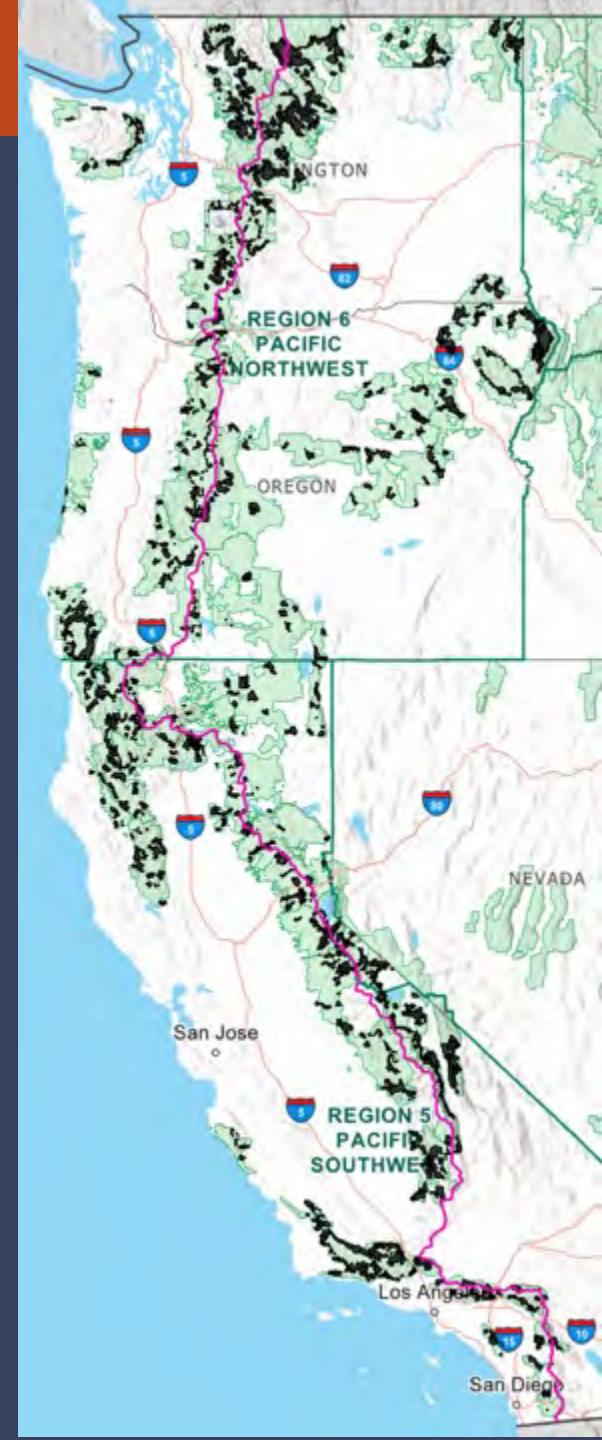

AUG 29, 2025

The Trump administration's decision to rescind the Roadless Rule, and open formerly inaccessible swaths of national forest to logging is making headlines again. And even though this is largely a nothingburger for reasons of gross incompetence, I wanted to take a minute to inject some reason into the panic. Here's a 30-second explanation of why you should stop freaking out.

What's Happening? Back in June, Secretary of Agriculture Brooke Rollins announced plans to scrap the Roadless Rule, Clinton-era policy that protected, as it sounds, areas of national forest that didn't already have roads from new road construction.

Now, USDA has announced its intent to conduct an environmental impact statement, and with that, hold an abbreviated 30-day public comment period.

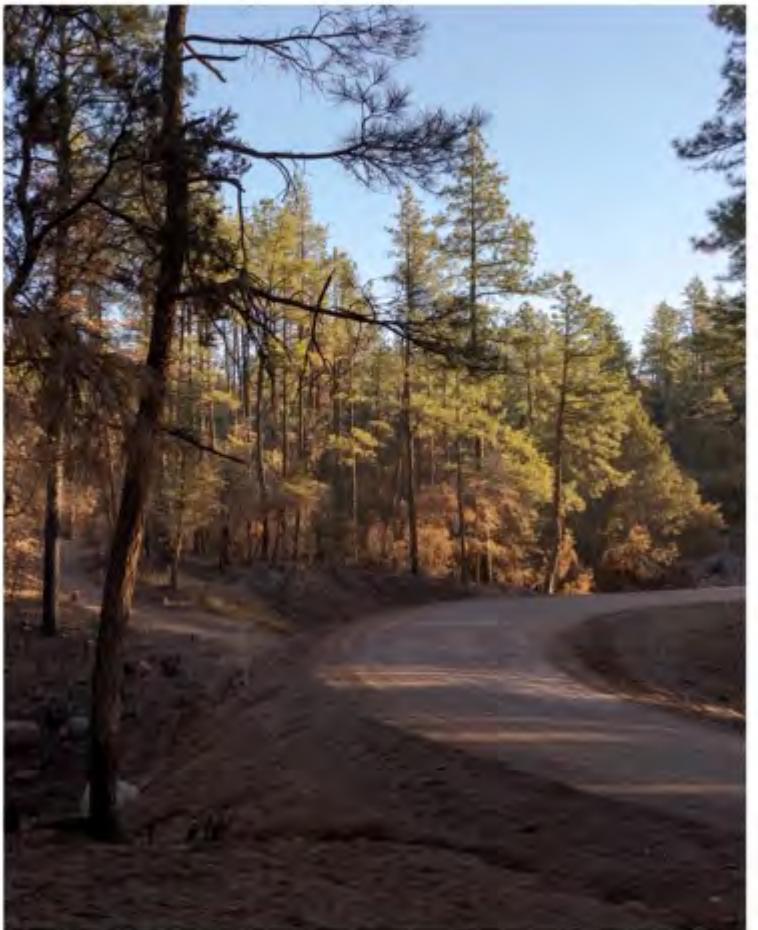

Happenings of Interest

The New York Times

We Can Do Something About Stressed-Out Forests

Aug. 31, 2025

Anna Watts for The New York Times

By Robert Bonnie

Mr. Bonnie oversaw the U.S. Forest Service and roadless policy during the Obama administration.

Protect California's Sierra Nevada Roadless Areas Before September 19th

The U.S. Department of Agriculture has announced its intent to **rescind the 2001 Roadless Rule**, which safeguards 3.9 million acres of wild, undeveloped forests in California — including hundreds of thousands of acres in the Sierra Nevada.

This landmark policy limits new road construction and industrial logging in undeveloped national forest lands, ensuring they remain wild while still allowing for wildfire prevention projects, recreation, and existing road maintenance.

For more than 20 years, the Roadless Rule has protected landscapes that are critical for clean water, biodiversity, Tribal cultural resources, and recreation-based economies across our region.

New, these protections are under threat. The U.S. Forest Service, under directive from the Agriculture Secretary, is considering removing Roadless Rule safeguards. If rescinded, these lands could be opened to new road building, logging, and development, fragmenting some of the last intact forests in the Sierra and undermining California's climate and conservation goals.

You have a chance to help stop this rollback. The U.S. Forest Service is accepting **written comments from August 29 through September 19, 2025**.

Please join us in urging decision makers to keep the Roadless Rule intact.

Here's how you can take action:

1. Submit a public comment by September 19th

Go to the notice posted on [Regulations.gov](#) and click on the "Comment" button to submit your letter directly to the U.S. Forest Service. Personal stories are powerful — share how you hike, ski, fish, camp, or connect culturally with roadless areas. You can use [this script](#) to help draft your message.

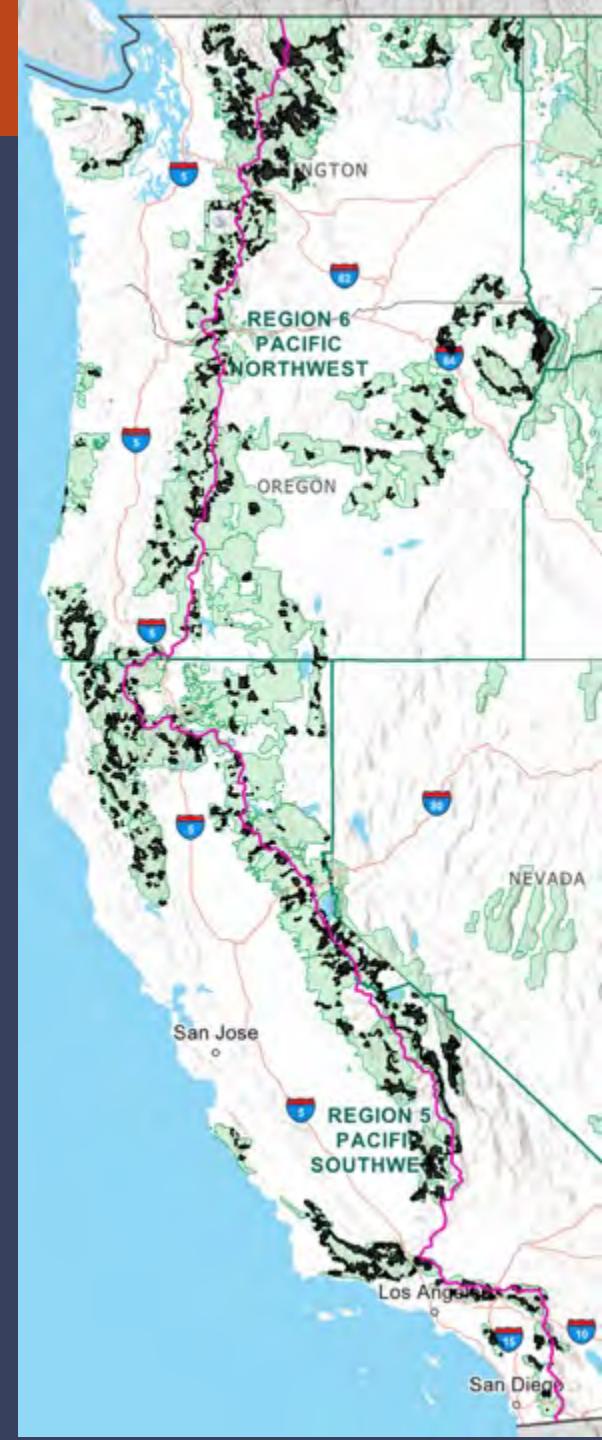

2. Share your concern with your U.S. Representative

Legislators need to hear that their constituents overwhelmingly support keeping roadless protections in place. Find your representative [here](#) and email their office. You can use [this script](#) to help draft your message.

3. Elevate this issue publicly

Share this alert on social media with your own photos or stories of roadless areas. Like, share, and comment on posts about the Roadless Rule — every interaction boosts visibility and spreads awareness.

4. Circulate an action alert with your network

Bob Gardner Updates – September 8, 2025

Roadless Rule

- The Forest Service Roadless Rule, initially established in 2001, prohibited road construction, reconstruction, and timber harvesting on nearly 60 million acres of inventoried roadless areas within National Forests to protect wild landscapes.
- Rescinding the 2001 Roadless Rule is intended to return decision making for road construction, road reconstruction, and timber harvesting in inventoried roadless areas to local officials, in conjunction with Forest-level land management planning.
- In August 2025, the USDA Forest Service announced plans to rescind the rule, intending to allow local officials more flexibility in managing these areas and return control to state and forest-level planning.
- The proposed rule, accompanied by a draft EIS, is expected by March 2026, along with a request for additional public comment. The final rule, EIS, and record of decision are expected to be released in late 2026.

Europe lost an area the size of Cyprus to wildfires this year

More than 1,900 fires have been sparked across the EU, scorching a record 3,806 square miles.

BY BLOOMBERG | 09/06/2025 06:06 AM EDT

CLIMATEWIRE | Patricia Lamela was driving back to the Galician town of Larouco in northwest Spain when she got the call. It was Aug. 13, just before 7 p.m. local time, and a neighbor told her there was a fire in the forest.

Lamela, the mayor of Larouco, wasn't surprised by the news. The area around her small village of less than 500 residents had been baking at temperatures above 40 degrees Celsius (104 degrees Fahrenheit) for over two weeks amid one of the [longest and hottest heat waves](#) on record in Spain. Weeds and bushes that had thrived during a particularly wet spring dried up and became fuel to the fire. The absence of people cleaning and maintaining the forest in one of Spain's least populated regions meant a [large blaze](#) was only a matter of time.

With her hand still on the steering wheel, Lamela notified regional authorities and asked for help. Then, she called the clerk to get the town's only fire truck ready and asked a nephew to post a message on the village's WhatsApp group calling for volunteers.

"For the first few hours, it was just us neighbors and our truck," she said. "The regional government and their resources were fighting fires elsewhere."

Within hours the Larouco Fire became the [biggest on record](#) in Galicia, burning through more than 116 square miles. The town was not alone in its misery, as dozens of similar blazes were erupting across Spain and Portugal over mid-August, overwhelming authorities and leaving officials struggling to coordinate extinguishing efforts across dozens of agencies and departments, according to multiple accounts by local politicians, firefighters and neighbors who all fought the flames themselves.

Beyond the Iberian Peninsula, it's been a similar tale of destruction in Europe. This year, more than 1,900 wildfires have sparked across the EU, scorching a record 3,806 square miles — an area larger than Cyprus, according to satellite estimates from the EU's [European Forest Fire Information System](#).

Trump EV freeze is showing signs of thawing

Nonprofits and states are piling into a battle to unfreeze billions of dollars in funds under the National Electric Vehicle Infrastructure program.

BY DAVID FERRIS | 08/04/2025 06:21 AM EDT

An electric vehicle charges at an EVgo fast-charging station in Detroit on Nov. 16, 2022. | Paul Sancya/AP

ENERGYWIRE | One White House attack on clean energy is generating serious legal pushback: a freeze on billions of federal dollars meant to create a network of electric vehicle charging stations.

First, in June, a judge ordered the Department of Transportation to resume funding the program for 14 states that had sued to get the money unfrozen. Last month, the judge admitted a herd of new plaintiffs, making it more likely that the program will resume nationwide.

GREENWIRE

Appeals court says EPA can recover 'green bank' funds

The ruling helps clear the agency's way for clawing back billions of dollars the Biden administration had wanted to use for green lending.

BY JEAN CHEMNICK | 09/02/2025 01:01 PM EDT

EPA Administrator Lee Zeldin speaks during a June 11 policy announcement at EPA headquarters. | Francis Chung/POLITICO

GREENWIRE | A federal appeals court ruled Tuesday that EPA may void \$20 billion in climate law grants that have been under contract for a year.

The ruling by a three-judge panel of the U.S. Court of Appeals for the District of Columbia Circuit would allow EPA to claw back the balance of those grants now held in frozen accounts at Citibank. But the court barred EPA from removing the funds for one week after its opinion was issued to allow plaintiffs to petition for appeal.

CLIMATEWIRE

In Hawaii, new tourism tax aims to offset costs of climate change

The "green fee," which takes effect Jan. 1, 2026, will fund environmental projects, such as beach restoration or the removal of fire-prone grasses.

BY BLOOMBERG | 08/07/2025 08:09 AM EDT

Wilting palm trees line a property destroyed by wildfire in Lahaina, Hawaii, on Dec. 8, 2023. | Lindsey Wasson/AP

CLIMATEWIRE | As Hawaii nears the second anniversary of the Maui fires — which scorched 17,000 acres of residential and commercial buildings, cultural landmarks, and vegetation, causing \$5.5 billion of damage — its government is turning to tourism to mitigate future climate-related disasters.

A new "green fee," proposed by Gov. Josh Green (D) and passed through the Legislature on May 2, is now the first of its kind in the country. It aims to raise some \$100 million each year by marginally hiking tourism levies — from 10.25

HAWAII'S GREEN TAX: A PIONEERING STEP TOWARD SUSTAINABLE TOURISM

Justin N. Froyd - Sep 8, 2025 0

Hawaii is poised to be the first state in the U.S. to enact a green tax specifically on tourism. Starting in 2026, stays at hotels, vacation rentals, and even cruises will have a bit extra tacked on. This tax, adding 0.75% to the current Transient Accommodations Tax (TAT), aims to generate around €85 million a year.

AB 518: Low-impact camping areas.

Session Year: 2025-2026 House: Assembly

Current Status: IN PROGRESS (2025-09-02: Read second time. Ordered to third reading.)

Timeline: Introduced → First Committee Review → First Chamber → Second Committee Review → Second Chamber → Enacted

Summary Bill Text Status Votes Supporters & Opponents Analysis

Authors shown for version: Amended Senate (8/29/2025)

Bill Author: Chris Ward (D)

Bill Co-Author(s): Damon Connolly (D), Liz Ortega (D), Chris Rogers (D)

Version: Amended Senate (8/29/2025) ▾

Existing law, the Special Occupancy Parks Act, establishes requirements for the construction, maintenance, occupancy, use, and design of special occupancy parks. Existing law defines special occupancy park to mean a recreational vehicle park, temporary recreational vehicle park, incidental camping area, or tent camp.

This bill would specify that, for purposes of that act, a special occupancy park does not include a low-impact camping area, as specified, that is located in a county that has enacted an ordinance, as specified, authorizing low-impact camping and meeting specified requirements. The bill would impose specified requirements on owners of private property offering low-impact camping area sites and on online hosting platforms. The bill would define a low-impact camping area to mean any area of private property that provides for the transient occupancy rental of a temporary sleeping accommodation, as defined, for recreational purposes that is not a commercial lodging facility. The bill would specify that a low-impact camping area is not a special occupancy park if, among other things, it meets certain requirements, including compliance with applicable local requirements relating to waste disposal and quiet hours, as specified. The bill would require that a county that has authorized low-impact camping to take specified actions, including, among others, to establish a registry of low-impact camping areas, as specified, and to notify the Department of Housing and Community Development of the county's choice to authorize low-impact camping areas. The bill would also require all state and local eviction processes applicable to a special occupancy park to apply to a low-impact camping area.

Hi All,

Let me know if this is the kind of thing that's helpful!

Call to Action: Tell your State Legislators to vote YES on AB 518

Context: Getting outside is crucial to our way of life, rural economies, and well being as Californians. But every year public lands campsites are more competitive and expensive than the year before. That's why [California Assembly Bill 518 \(AB 518\)](#) is so important. The bill will unlock opportunities for landowners across the state to share their private land for public recreation, increasing outdoor access and equity. Join us and thousands of landowners and campers across the state by emailing your state legislators to ask them to support this bill.

[**Find your legislators here**](#) and email them this message:

Subject: Vote Yes on AB 518!

Hello,

As a resident of your district, I am writing to ask that you please vote YES on AB 518.

I love camping, but finding a campsite can be impossible. Between competition, overcrowding, and the closure of thousands of campsites on public land across California this summer, it's never been harder to get outside. Low-impact camping is an affordable and safe way to get more people outside, support rural landowners, and bolster rural economies. Please vote YES on AB 518.

Thank you,

Wildlife Conservation Board Awards \$21.7 Million in Grants to 16 Habitat Conservation and Restoration Projects

August 28, 2025

Grants Will Protect Nearly 14,000 Acres, Including Rare Peat Fen Wetland in Humboldt County

The Wildlife Conservation Board (WCB) has approved \$21.7 million in grants to support 16 habitat protection and restoration projects in 11 counties across California. Awarded at WCB's August 28 meeting, the projects will support biological diversity across 13,940 acres of the state's most ecologically important landscapes.

Among the awards is a \$559,000 acquisition by **California Department of Fish and Wildlife** (CDFW) to protect 120 acres near Bridgeville in Humboldt County. The property includes a rare peat fen wetland — a sensitive, permanently saturated natural wetland community ranked as "critically imperiled" — along with mixed evergreen hardwood and riparian forest.

Why San Francisco still owns a California town with just 63 people

San Francisco couldn't exist without a town in the Sierra called Moccasin

Moccasin, Calif., is a town in the Sierra Nevada that is owned by San Francisco.
Silas Valentino/SFGATE

By Silas Valentino, Travel Editor
Aug 31, 2025

MOCCASIN, Tuolumne County — At the base of a steep grade in the Sierra Nevada off a highway that leads into Yosemite National Park is an unincorporated community with 63 people and not much else. There's no grocery store or gas station in Moccasin, but it has a stately pink powerhouse and a quaint row of Spanish Colonial-style cottages topped with red-tiled roofs. The lawns are lush and the air smells of mountain pine. When a neighbor drives by, usually in a white utility truck, it's all but guaranteed they'll flash you a wave.

The Scott Dam at Lake Pillsbury in Lake County will come down if Pacific Gas and Electric Co. wins approval to remove it. The dam's removal will free the Eel River but destroy the vacation community around the lake.

Carlos Avila Gonzalez/S.F. Chronicle

HEALTHCARE

REC & TOURISM

NATURAL & WORKING LANDS

AGRICULTURE

SECTOR DEFINITIONS

SUSTAINABLE RECREATION & TOURISM

This sector includes natural and cultural attractions, arts, outdoor activities, events, and historic sites. Sustainable tourism leverages these assets to drive jobs and growth while balancing economic, social, and environmental impacts.

NATURAL & WORKING LANDS

This sector covers forest and watershed management, timber harvest, cultural burning, and supply chain development. Prioritizing these lands reduces wildfire risk, improves air and water quality, and centers tribal knowledge.

SUSTAINABLE AGRICULTURE & FOOD SYSTEMS

This sector builds local food systems through regenerative farming, efficient land use, and food sovereignty. It spans production, processing, distribution, retail, consumption, and waste recovery.

COMMUNITY HEALTHCARE

This sector strengthens access to facilities, providers, and services while creating stable healthcare jobs. Investments in infrastructure, workforce training, and equity ensure care for rural, tribal, and underserved communities.

FOUNDATIONAL ELEMENTS

SOCIAL AND CIVIC INFRASTRUCTURE

A strong social and civic infrastructure network, including childcare, transportation, food security, and general social services, is the backbone of our communities.

LAND USE AND TENURE

Land use and tenure balance property rights with community priorities to improve quality of life. Collaboration among local, tribal, and government partners creates roadmaps for prosperity and resource stewardship.

PHYSICAL INFRASTRUCTURE

Modernized physical infrastructure, including water, sewer, telecommunications, broadband, and transportation, is essential for a sustainable economy.

SMALL BUSINESS AND ENTREPRENEURSHIP

Supporting small businesses drives job creation and economic diversity. Access to capital, technical assistance, and vibrant downtowns help local ventures thrive.

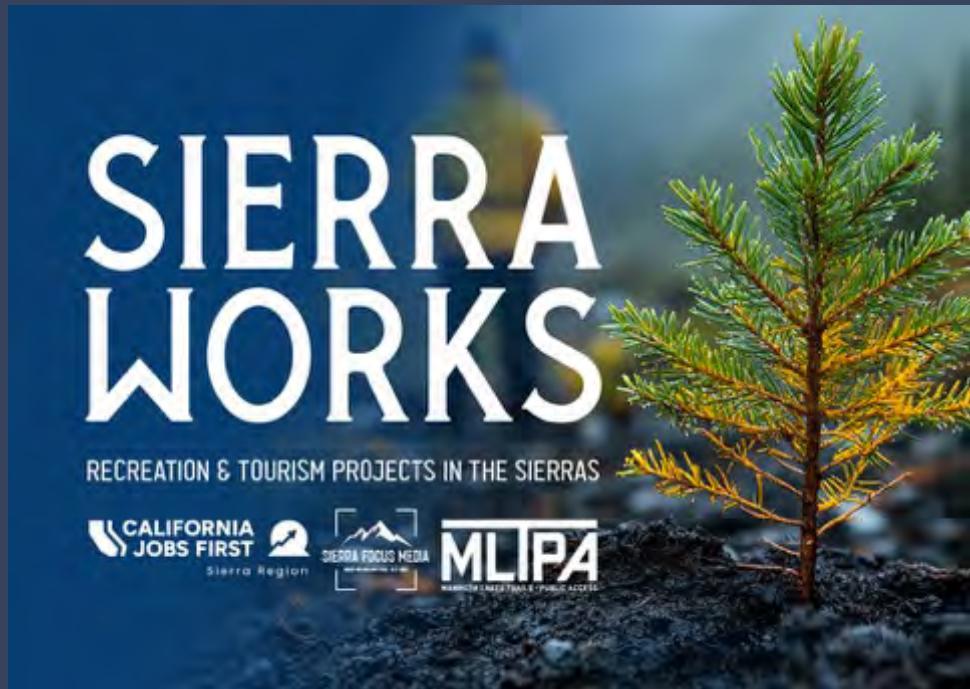

HOUSING AND PLACEMAKING

Housing covers the building, ownership, and management of homes, shaping quality of life. Placemaking engages communities in designing public spaces that foster connection and belonging.

WORKFORCE DEVELOPMENT AND EDUCATION

A cradle to career approach ensures equitable access to education and training for all community members from primary, secondary, higher, and vocational education to employment.

Sierra Jobs First: Catalyst Project Updates

Tuesday, Sept. 9 | Presummit Site Visits

Before the Summit, join us for a series of **Catalyst Project tours** across the Eastern Sierra. This is your chance to see projects in action, meet local leaders, and learn about on-the-ground work shaping regional economic development.

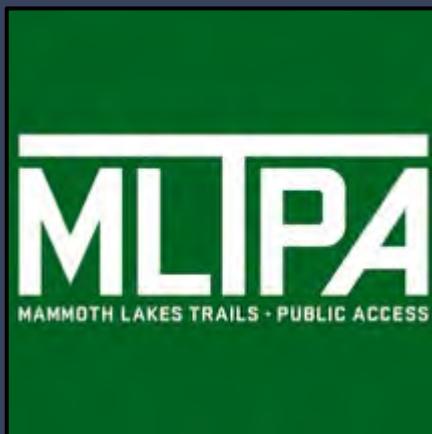

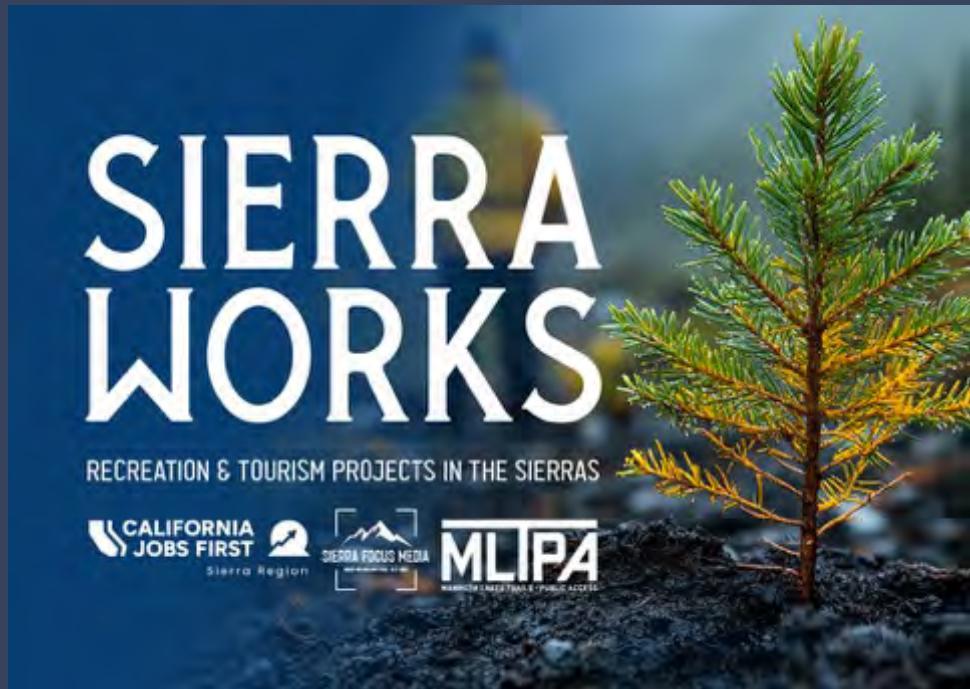

Schedule:

- 12:00 PM | Coldwater Campground (Mammoth Lakes, CA)
Hosts: John Wentworth & Chris Buehrer
- 2:00 PM | Eastern Sierra Business Resource Center (Bishop, CA)
Hosts: Elaina Kabala & Meryl Picard
- 3:00 PM | Food Sovereignty Program (Bishop, CA)
Host: Milo Vella
- 4:00 PM | Chipmunk Canyon Site Visit (Bishop, CA)
Host: Elaine Kabala
- 5:00 PM | Blue Heron Farm + Towns to Trails Route Alignment (Wilkerson, CA)
Host: Rachel Kulchin

[RSVP To Participate](#)

Tour is open to the public but space is limited. Please RSVP to let us know that you are coming!

Sierra Jobs First: Catalyst Project Updates

Wednesday, Sept. 10 | Summit Agenda

Officially kicking off with Coffee, Free Breakfast Burritos, & Cross Industry Collaboration. Discussions will be centered around our economy's past, present, & future.

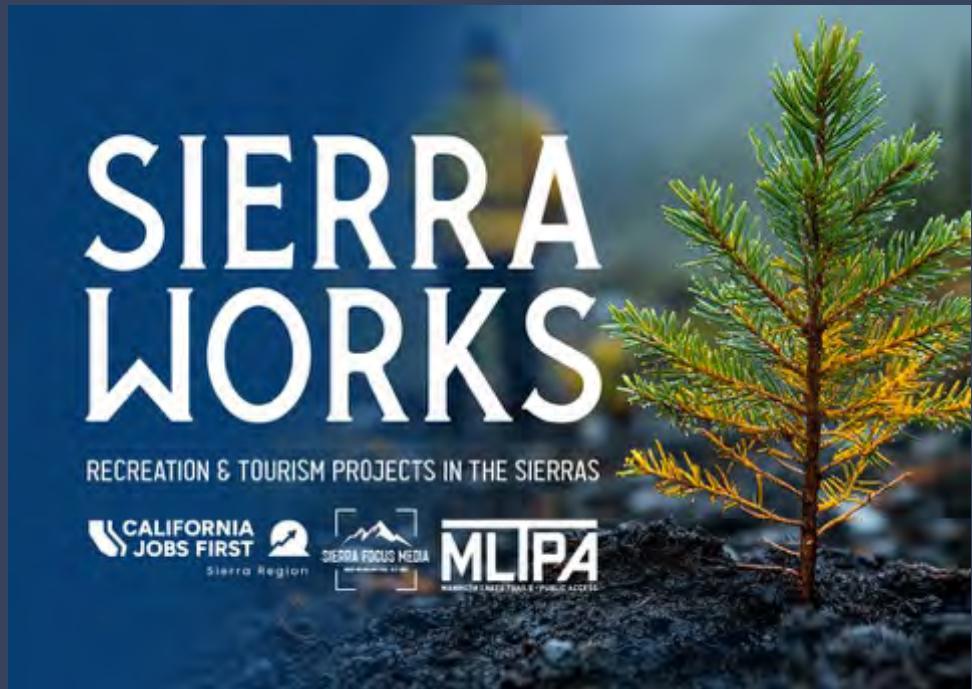

Where: Cerro Coso Community College, Bishop, CA

When: 9:00 AM – 12:00 PM

- **9am Meet & Greet**
 - Complimentary Breakfast Burritos from Rolling Chef
 - Catalyst Projects are invited to bring materials to leave at the "Project Corner" to share project information, event/newsletter sign up sheets, contact information, collaborative asks/offers, and more about their projects.
- **10 am Welcome**
 - Orientation to Jobs First
 - Review of where we've been, where we're going
- **10:20am Project Updates**
 - TED Talk style presentations from a Sierra Jobs First Catalyst Funded Projects
- **11am Future State**
 - Elaine Kabal, Eastern Sierra Council of Governments, and Alex Bloom, Central Sierra Economic Development District
 - CSEDD/ESCOG Core Areas of Focus
 - Panel and Q&A
 - Lunch and next steps
- **12pm Lunch in Bishop**
 - We encourage attendees to enjoy lunch at a local restaurant! Recommendations will be provided at the event.

Sierra Jobs First: Catalyst Project Updates

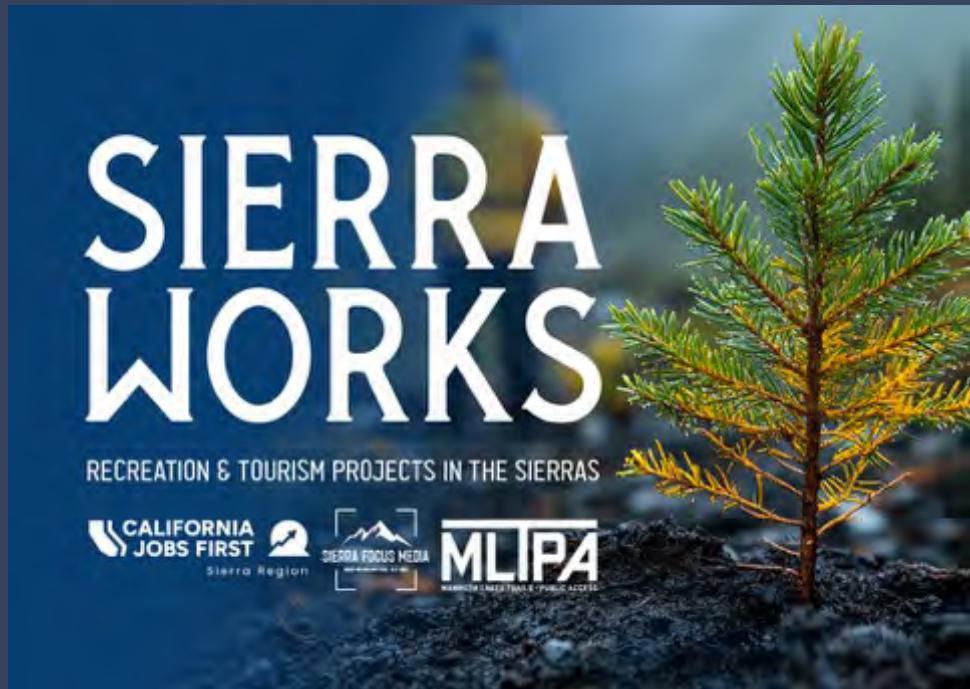

Thursday, Sept. 11 | Sierra Health Industry Partnership

Be part of a high-impact regional gathering focused on **aligning healthcare, education, and workforce priorities across the Sierra**. This no-cost, public event has limited space.

- Mono County Civic Center – 1290 Tavern Rd, Mammoth Lakes, CA 93546
- 8:00 AM – 4:00 PM

[RSVP Here](#)

Sierra Jobs First: Catalyst Project Updates

Friday, September 12 | Sierra Jobs First Governing Council

In-person meeting of the Sierra Jobs First Governing Council and Industry Sector Coordinators. The meeting will be open to the public but space is limited.

- Mono County Civic Center – 1290 Tavern Rd, Mammoth Lakes, CA 93546
- 9:00 AM – 1:00 PM

[RSVP here](#)

Sierra Jobs First: Catalyst Project Updates

SEVEN COUNTIES. ONE STRATEGY.

We are working to build a community-led, climate-forward economy that works for everyone in our region, particularly those from disadvantaged communities.

WHAT ARE THE FOUNDATIONAL ELEMENTS OF JOBS FIRST?

Foundational Elements capture projects that support the inherent conditions in the region that must be addressed if economic prosperity for all is to be realized. The foundational economic elements supporting the region's competitiveness include workforce development and skills, physical infrastructure, social and civic infrastructure, community health, placemaking, housing, and land tenure and land use.

The Sierra Jobs First strategic approach focuses on fortifying the region's economic foundations through targeted initiatives. This involves addressing critical areas such as enhancing access to capital, advancing workforce development, and creating a conducive environment to diversity and drive sustainable growth across diverse, under-represented industry sectors, including manufacturing, technology, and services.

HOUSING AND PLACEMAKING

Housing encompasses the building, usage, ownership, and management of homes, which is critical in shaping quality of life. Placemaking, a process that involves engaging community residents in planning, designing, and managing public areas, is a key element in creating spaces people love and feel connected.

LAND USE AND TENURE

Effective land use and tenure involve managing property rights and usage to benefit local priorities and improve quality of life. Collaborative efforts among local communities, including federal, state, tribal, and utility land managers, will achieve mutual goals supported by a land exchange or divestiture roadmap. This cooperation will drive local prosperity and resource stewardship.

PHYSICAL INFRASTRUCTURE

Modernized physical infrastructure, including water, sewer, telecommunications, broadband, and transportation, is essential for a sustainable economy.

SMALL BUSINESS AND ENTREPRENEURSHIP

Supporting small businesses and entrepreneurs is crucial for economic diversification and job creation. Providing technical assistance, access to capital, and fostering vibrant downtown cores will promote local ventures and create a sense of place.

SOCIAL AND CIVIC INFRASTRUCTURE

A strong social and civic infrastructure network, including childcare, transportation, food security, and general social services, is the backbone of our communities.

WORKFORCE DEVELOPMENT AND EDUCATION

A cradle to career approach ensures equitable access to education and training for all community members from primary, secondary, higher, and vocational education to employment.

SECTOR DEFINITION

The Community Healthcare sector focuses on ensuring the region's residents' access to high-quality jobs in a stable or growing healthcare sector while breaking down healthcare barriers and addressing access challenges in our rural, remote region.

It ensures the region has sufficient healthcare resources, including facilities, providers, and services. Investing in healthcare infrastructure, expanding workforce development programs, and enhancing services can ensure equitable healthcare for all, including tribal members, isolated communities, and disinvested youth.

SECTOR SNAP SHOT

While healthcare represents approximately 9.3% of regional employment, the SFJ region employs roughly 40% fewer healthcare workers as a percentage of total workers than statewide averages. This indicates a need and opportunity to grow high-road jobs in the region with suitable investment, training, and support. In addition to training, the region needs investment in new treatment facilities, medical transportation, and long-term resident care options.

Sierra Jobs First: Catalyst Project Updates

SECTOR DEFINITION

The Natural and Working Lands sector includes forest management practices like ecological restoration, forest thinning, prescribed fire, cultural burning, grazing, non-industrial timber harvest, watershed management, and reforestation. It also involves developing supply chains, such as environmental planning, licensed timber operators, logistics, and wood utilization facilities.

Prioritizing natural and working lands reduces wildfire risk and improves water and air quality while emphasizing tribal engagement and traditional ecological knowledge.

SECTOR SNAP SHOT

Natural and working lands are a critical industry sector in the region. The sector has a location quotient of 2.27, indicating it has more than twice the expected employment compared to statewide numbers. Forestry, mining, and environmental quality programs have higher location quotients, indicating these positions have higher representation ratios than the rest of the State.

However, to align with State initiatives and work toward a more sustainable economy, industries like forestry, agriculture, waste management, and environmental quality programs must attract new education and training opportunities. Mining represents less than 1% of jobs in the region and shows a projected 10-year decline.

INDUSTRY COORDINATOR CONTACT INFORMATION

Mother Lode Job Training: Sophia Kaufman, skaufman@mjt.org

Travis Nababe - Tribal Coordinator travis.nababe@gmail.com

SECTOR DEFINITION

The Sustainable Agriculture sector includes building local and regional food supplies, expanding regenerative agriculture, and maximizing limited land resources to create an integrated system that benefits both people and the land. A key initiative of this sector is also promoting food sovereignty, specifically for Indigenous community members in our region.

Food sovereignty refers to the right to healthy, culturally appropriate, and ecologically produced food. Components of this sector include production, processing, distribution, retail, consumption, and waste recovery.

SECTOR SNAP SHOT

The high level of employment in food and beverage retail operations underscores the importance of building connections with other sectors, such as sustainable tourism, to generate a more significant regional impact. Most agricultural employment in the region is concentrated in food and beverage retail and beverage and tobacco product manufacturing. There is limited employment in traditional crop and animal production, possibly due to the influence of the climate and topography of the Sierra region. However, on-site research indicates a growing interest in expanding this sector through collaborative efforts on tribal land use, non-profit food hub ventures, and establishing value-added processing facilities.

INDUSTRY COORDINATOR CONTACT INFORMATION

Mother Lode Job Training: Sophia Kaufman, skaufman@mjt.org

Travis Nababe - Tribal Coordinator travis.nababe@gmail.com

SECTOR DEFINITION

The Sustainable Tourism industry Sector includes natural and cultural attractions, arts, outdoor activities, events, and historic sites. Sustainable tourism is focused on current and future economic, social, and environmental impacts and addresses the needs of visitors, the industry, the environment, and host communities.

Data and feedback indicate the region's robust recreation and tourism sector is a critical economic driver. Leveraging the region's natural assets, arts, historic sites, and community events has significant potential for developing quality jobs.

SECTOR SNAP SHOT

Sustainable rec and tourism dominate the regional economy and represent nearly 25% of all employment. This sector is broad in scope and includes everything from lodging to outdoor recreation, arts and cultural attractions, food service, and some retail operations.

This industry sector represents one of the most significant areas for wage improvement to achieve region-wide income goals, as many jobs in this sector today pay under \$50,000 annually. Strategies in this sector will need to work to find creative ways to build opportunities for high quality job growth in these specific industry areas.

Sierra Jobs First: Funding and Technical Assistance

Funding Support

Project Description: As the Industry Sector Coordinator for Sustainable Recreation & Tourism projects, MLTPA is committed to providing funding and policy support to help bring your project to life. To assist you, we have developed a comprehensive database featuring:

- Funding Opportunities – A curated list of grants and financial resources available in the sustainable recreation and tourism sectors.
- Policy Documents & Data Resources – A collection of relevant policies, regulations, and data to help inform and guide your project's development.

Beyond these resources, MLTPA offers personalized support to ensure your project aligns with available funding opportunities and meets current policy requirements. MLTPA is here to assist in the grant application process, helping you navigate funding requirements and maximize your chances of success. We are also here to provide one-on-one policy consultation, offering expert guidance on how to develop your project within the existing regulatory framework.

For more information or to discuss how we can support your project, contact us at sjadmin@mltpa.org. We look forward to helping you turn your vision into reality.

FUNDING OPPORTUNITIES

MLTPA has assembled a database of funding opportunities for sustainable recreation and tourism projects for Sierra Jobs First. This database is a snapshot of opportunities that may align with projects submitted by stakeholders consistent with the Sierra Jobs First Regional Strategy.

ANDREA STEWART, RESEARCH & POLICY ANALYST

Andrea is a policy analyst with a career dedicated to working at the intersection of environmental justice and human rights, including many years of living and working in the West Bank on questions of law and ethics. Andrea is adept at navigating diverse social and political landscapes. A JD candidate residing in Mammoth Lakes, Andrea combines her legal expertise with a deep understanding of policy development and a passion for fostering a more just and equitable Eastern Sierra. She analyzes federal, state, and local policies impacting the Eastern Sierra region and beyond, seeking to identify and address systemic inequities. In her free time, Andrea can be found peak bagging, backcountry skiing, climbing, or exploring the foothills on her horse. She holds M.A. and B.A. degrees in Human Rights Law and Political Science, respectively, and hails from a university town in Kansas.

Distinct Regional Economies Informed by Unique Natural Resources & Community Assets

California spans over 160,000 square miles, making it comparable in size to countries like Japan and Sweden.⁸³ Along with this vast scale comes a wide range of topographies and economies defined by these different natural features.

Natural Resources

California has more than 840 miles of coastline, the highest and lowest points in the continental U.S., more than 25,000 square miles of desert, and the tallest trees on the planet.⁸⁴ Our geographic variation is one of the reasons we are home to nine of the country's 61 national parks, the most of any state.⁸⁵ These parks drive significant tourism to California (nearly 11.4 million visitors in 2023),⁸⁶ contributing to the more than \$150 billion travel spend that took place in California in 2023, an all-time high.⁸⁷

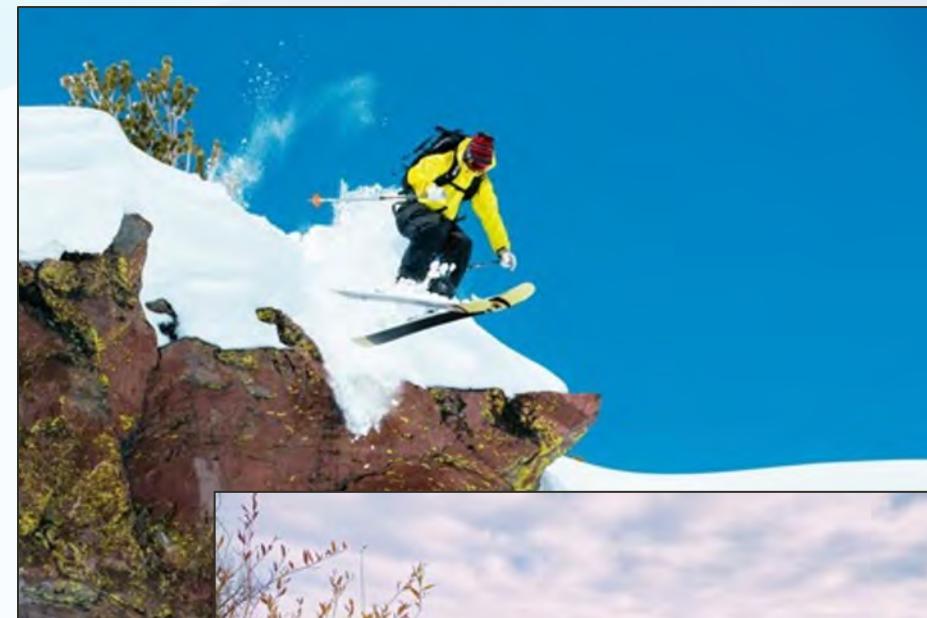

Our natural resources also underpin our leadership in other industries, from agriculture to renewable energy. Over one-third of the nation's vegetables and three-quarters of its fruits and nuts are grown in California alone.⁸⁸ We also boast an estimated 340,000 acres of land with potential for solar energy development,⁸⁹ as well as unparalleled deposits of critical minerals necessary for numerous clean technologies that comprise 15% of global rare-earth element supply.⁹⁰

OUR WORK TRAIL SYSTEMS ABOUT US CONTACT SUPPORT

Projects Tracked

Project Description: As part of the Industry Sector Coordinator Team for Recreation and Tourism, we partner with our colleagues at [Sierra Focus Media](#) to collaborate with all of the projects listed below to support their development through the Catalyst phase of Sierra Jobs First, ensuring alignment with the [Sierra Jobs First Strategic Plan](#). Our goals are to provide technical support and to identify funding resources for these Catalyst projects to bring them to life through their ultimate implementation. The individual projects listed below are subject to change as some project contracts are still pending. Once all contracts are fully executed, the Sierra Jobs First team at Sierra Business Council, which serves as the fiscal agent and regional convener for the California Jobs First Sierra region, will publish project updates, including the exact amount of the catalyst award received by each awardee on [SierraJobsFirst.org](#) and in the [Sierra Jobs First newsletter](#). Through those resources, you can find information on all of the awarded Catalyst projects, not just those in the Recreation and Tourism sector. We encourage you to check back to this page for updates on the Recreation and Tourism projects as we actively engage with these projects and drive progress in the Sustainable Recreation & Tourism sector, and to reach out to MLPA and Sierra Focus Media at sjadmin@mlpa.org for more information. If you have questions about any of the Catalyst awards across all sectors, including project descriptions, award amounts, lead organizations, and/or counties/industries/foundational elements addressed, or if you are an awarded project with questions about contracting, invoicing, reporting, or need other administrative help, please reach out to your assigned Sierra Jobs First team liaison directly, or to the general Sierra Jobs Team at jobsfirst@sierra-business.org. As it becomes available, you can click on the project's title below to view additional project information.

Recreation & Tourism Catalyst Projects

CHIPMUNK CANYON EXISTING CONDITIONS ANALYSIS
The project will develop an existing conditions analysis of the unauthorized trail network to inform required environmental review, determine feasibility of a formal trails network, identify and plan for recreation amenities, and engage Tribes and Interested communities to in a conceptual rec plan.

CREATIVE REUSE OF CREATIVE ARTS CENTER TUOLUMNE COUNTY
This project will collect donated materials from businesses to divert from landfills and offer maker workshops focused on STEAM/STEM education. It includes leasing a larger site, hiring educators for underserved communities, and a manager to structure the business.

EASTERN SIERRA REGIONAL CAMPGROUND IMPROVEMENTS & JOBS CREATION
This project aims to collect donated materials from local businesses otherwise go to landfill; utilize maker workshops to provide access to resources for STEM and STEAM focused learning and exploration for all ages; and hire necessary professional capacity.

PROJECT NAME

- Eastern Sierra Regional Trail System & Jobs Creation

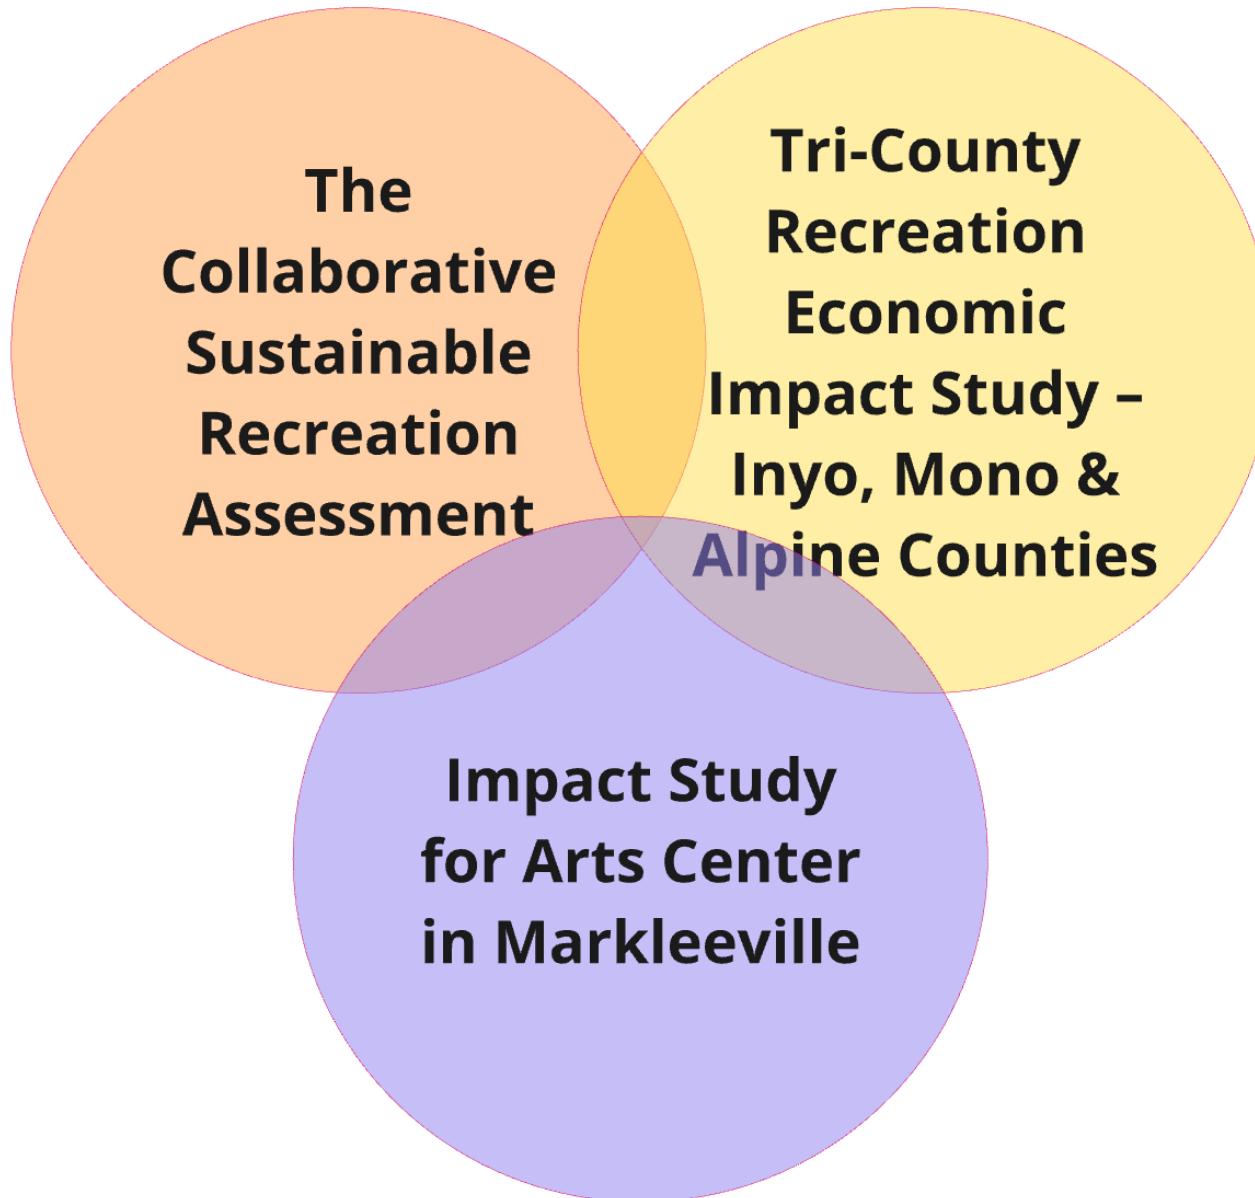

LEAD PROJECT APPLICANT

- MLPA

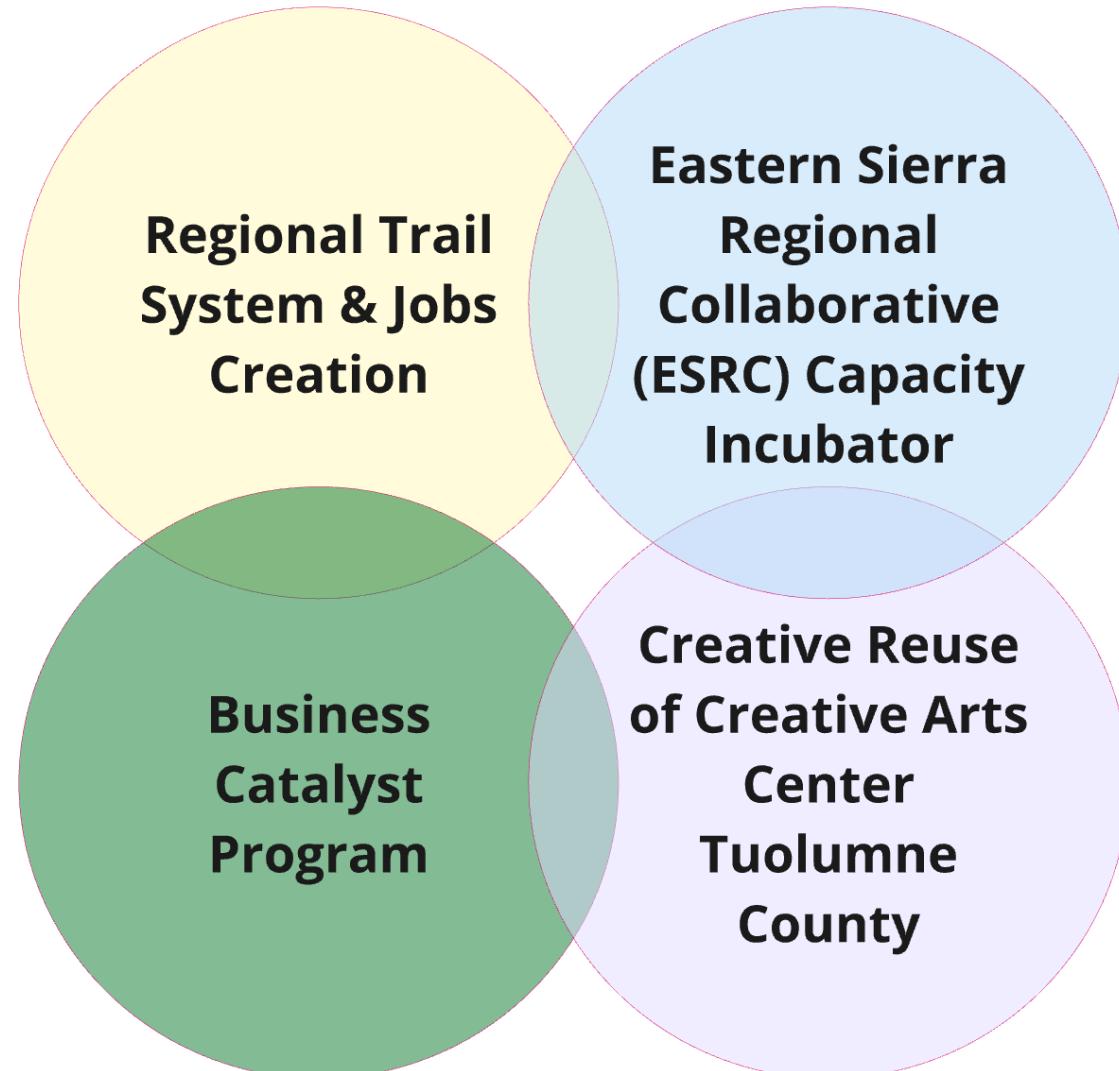

PROJECT DESCRIPTION

- MLPA is developing the Westside Towns to Trails Plan as a key component of a future Eastern Sierra regional trail system. This plan will complement the Eastside Towns to Trails Plan as finalized by the Eastern Sierra Council of Governments (ESCOG), which together, may one day form a cross-Sierra trail network linking gateway communities to public lands and each other through outdoor recreation. The Westside Trails Plan focuses on four counties in the California Jobs First Sierra Region, identifying opportunities for trail and infrastructure connectivity between communities, adjacent public lands, and ultimately to three eastside counties via northern Alpine County. Using the same methodology as the Eastside Towns to Trails plan, the Westside Towns to Trails Plan evaluates existing inventoried trail and system road infrastructure, maps potential alignments, works with community stakeholders, and identifies environmental planning needs. The plan also explores opportunities to extend the network into the Central San Joaquin Valley Jobs First Region, including Tulare, Fresno, and Madera counties, as well as Yosemite National Park. This work enhances regional recreation access, supports sustainable tourism, and promotes economic development by improving connectivity across diverse California landscapes, and all through the renewed utilization of existing infrastructure.

Inland Empire Regional Meeting

SEPTEMBER 4-5, 2025

The Inland Empire Community Foundation and the Inland Empire Resource Conservation District are hosting the California Wildfire and Forest Resilience Task Force Regional Meeting September 4 at the University of Redlands in San Bernardino County. A remote attendance option will be available via Zoom.

The meeting on September 4 will highlight the 2025 Action Plan and issues of regional importance. We will kick off the day with refreshments and a resource fair.

On September 5, Task Force partners will host field tours offering immersive opportunities to better understand the critical landscape health and wildfire resilience work being done in the region.

California Wildfire and Recreation

California Wildfire and Recreation

California Wildfire and Recreation

**THE
WILDFIRE
THREAT
IS REAL.**

Recreation can help.

CALIFORNIA VALUES ARE AT RISK.

Wildfire, climate change, and federal priorities threaten California's sustainable outdoor recreation, public lands, and way of life.

Our Solution...

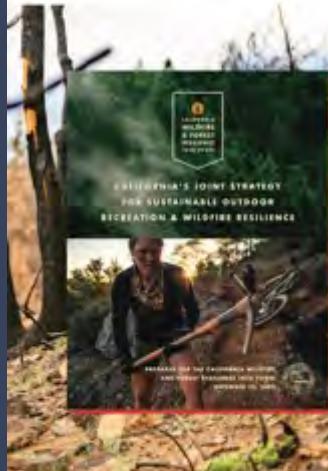

**California's
Joint Strategy
For Sustainable
Outdoor Recreation
& Wildfire Resilience**

**Adopt It
NOW!**

A Joint Strategy for California

Led by the Hammont Lakes Trail and Public Access Foundation (MLPA), "California's Joint Strategy for Sustainable Outdoor Recreation & Wildfire Resilience" is a bold, action-ready Joint Strategy that transforms recreation infrastructure and programming into community defense against climate-driven wildfire.

The wildfire threat is **REAL**.
Recreation can help.

**ACT
NOW**

Climate change is reshaping familiar terrain, wildfire risk is rising, and federal policies now prioritize natural resource extractions over all else. California's ecosystems, our outdoor recreation infrastructure, economy, and way of life are all at risk.

This matters to you.

Our Landscape Defines Us

From Yosemitie's granite cliffs to Big Sur's rugged coast, California's landscapes define who we are. But did you know that over 50% of California's landmass is managed by the federal government? The health of these federally managed places determine the health of our communities and economies. Wildfire, underfunding, and poor management threaten not only our iconic scenery but also the recreation infrastructure that keeps these lands accessible.

Outdoor Recreation in California Is Being Dismantled

California has no dedicated nationwide recreation infrastructure. We have always relied on the US Forest Service, the National Park Service, and other federal agencies to manage recreation programs and infrastructure on their lands. While recent efforts to sell public lands have stalled, the future is uncertain. Communities must act now to preserve trails, public access, and their outdoor recreation economies.

Revenue generated in CA outdoor
\$81.5 BILLION

and supports
545,000 DIRECT JOBS

California Values are at Risk

California's identity is rooted in stewardship, innovation, and equitable access to the outdoors. Conservation goals such as 30x30, nature-based climate solutions, and inclusive recreation are essential to our way of life. These values are at risk when federal priorities emphasize resource extraction over sustainable outdoor recreation.

50% of California's recreation budget is controlled by the federal government.

Recreation Infrastructure is Economic Infrastructure

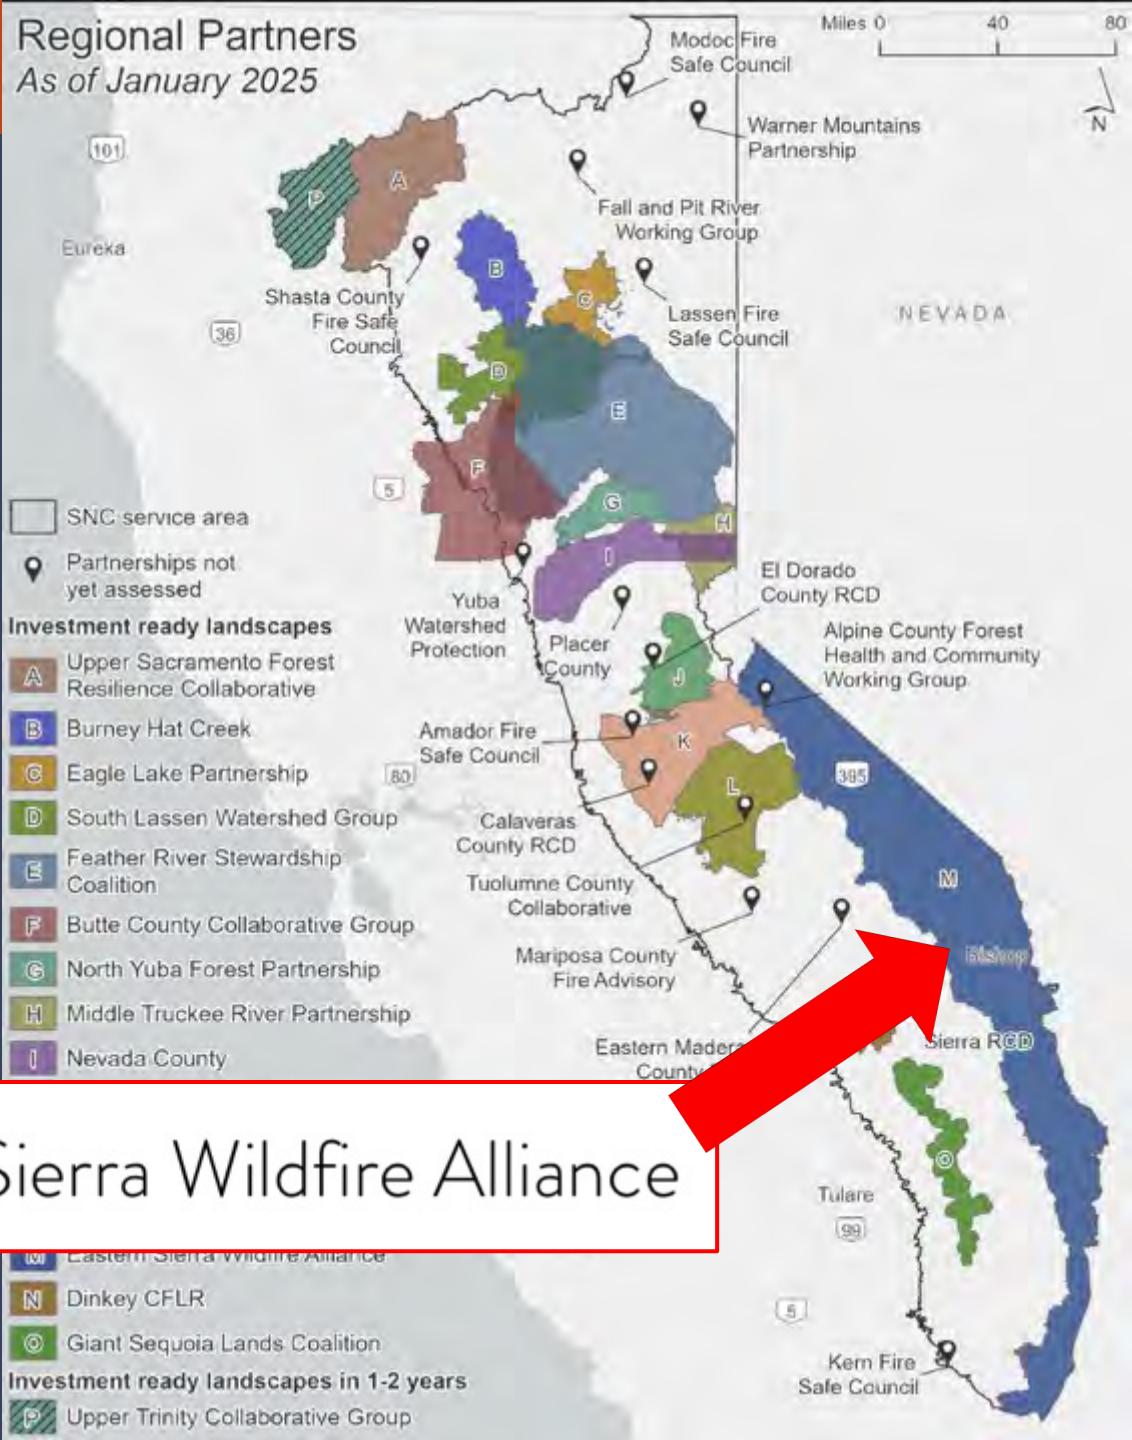

Outdoor recreation is a cornerstone of California's economy.

California Jobs First is a statewide economic framework that calls for building regional economies rooted in local strengths. In many communities, outdoor recreation is that strength. Investing in trails, campgrounds, and public access creates job opportunities, attracts visitors, and keeps small businesses thriving.

MARKETING CONTENT STRATEGY

VCP FIRE - SEASON 2

MAY - OCTOBER 2025

Date: Mar 25, 2025

Goals and objectives: “Ignite Awareness”

Create objectives that align with broader business goals. Separating them into primary, secondary, and long-term will provide focus and strategic direction. Here's an example:

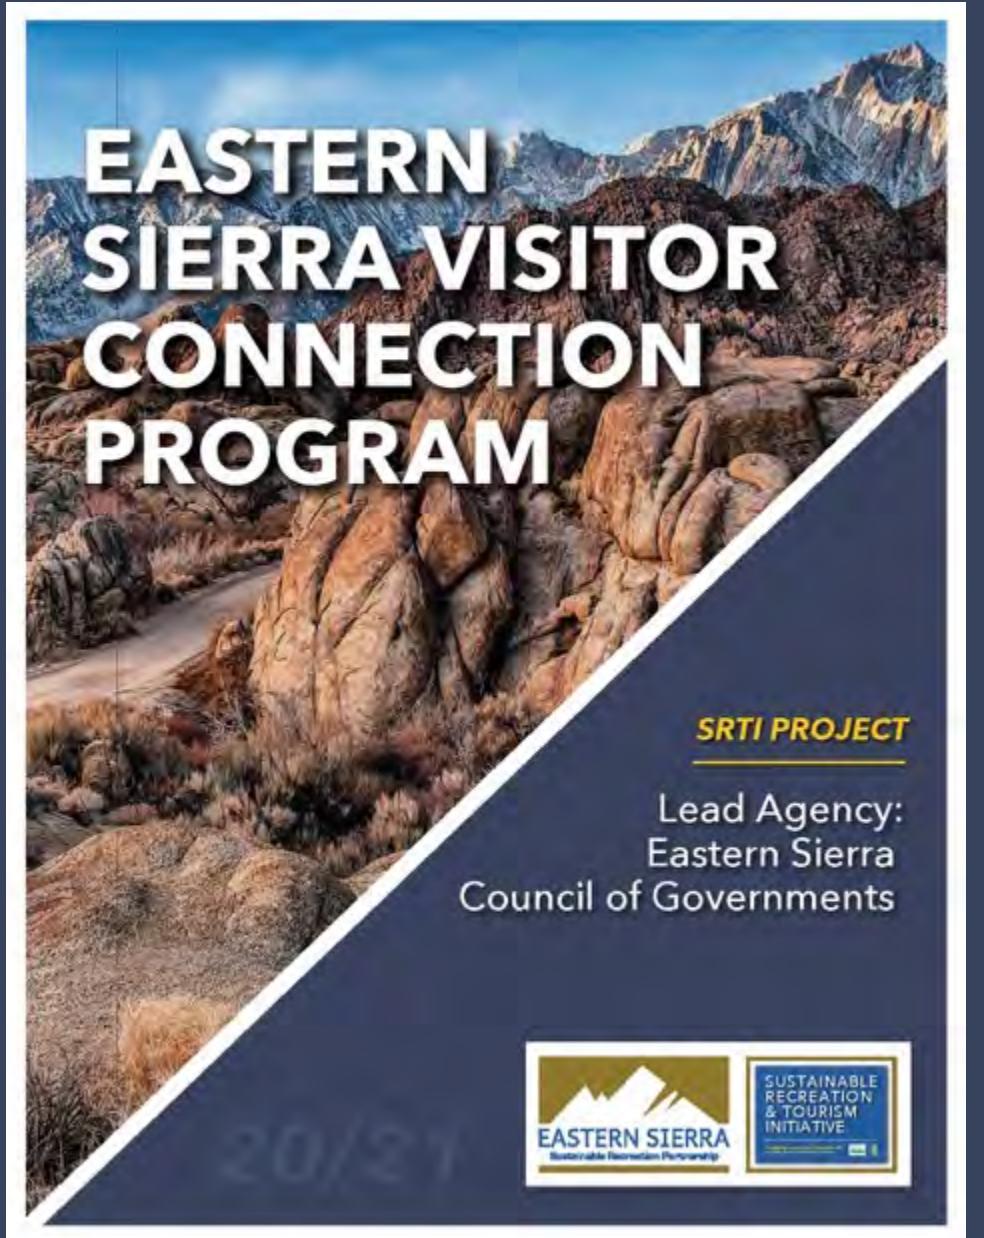

- Primary objective: Increase Impressions over the targeted time frame: **May 2025 - OCT 2025**
- Secondary objective: Increase web traffic conversations to the [Whitebark institute homepage](#).
- Long-term goal: Establish the agency as a trusted force for environmental conservation and wildfire resilience

Demographic analysis of the target audience

Geo-fencing should be a primary focus of this campaign due to the regional nature of our audience. Therefore, we should target areas and demographics most affected by wildfires. This data is based off overall metrics from Whitebark's Meta business Suite

Geographic location of the target audience

FOR IMMEDIATE RELEASE

Eastern Sierra Mussel Prevention Collective to Launch Pilot Program This Labor Day Weekend to Protect Local Waters from Invasive Species

EASTERN SIERRA, Calif. - (August 26, 2025) – A new coalition of federal and state agencies, and local governments, the Eastern Sierra Mussel Prevention Collective, announced today that it will establish two watercraft inspection and decontamination (WID) stations over Labor Day weekend. This pilot project is a proactive effort to protect the region's pristine lakes and rivers from the rapidly spreading threat of aquatic invasive species (AIS), including the recently detected Golden Mussel.

The Eastern Sierra Mussel Prevention Collective is a joint effort between the California Department of Fish and Wildlife (CDFW), the U.S. Forest Service, Los Angeles Department of Water and Power (LADWP), Southern California Edison, Mono County, and Inyo County.

The two WID stations will operate over the busy holiday weekend to intercept boaters and other watercraft users traveling into the Eastern Sierra. The stations will be located at:

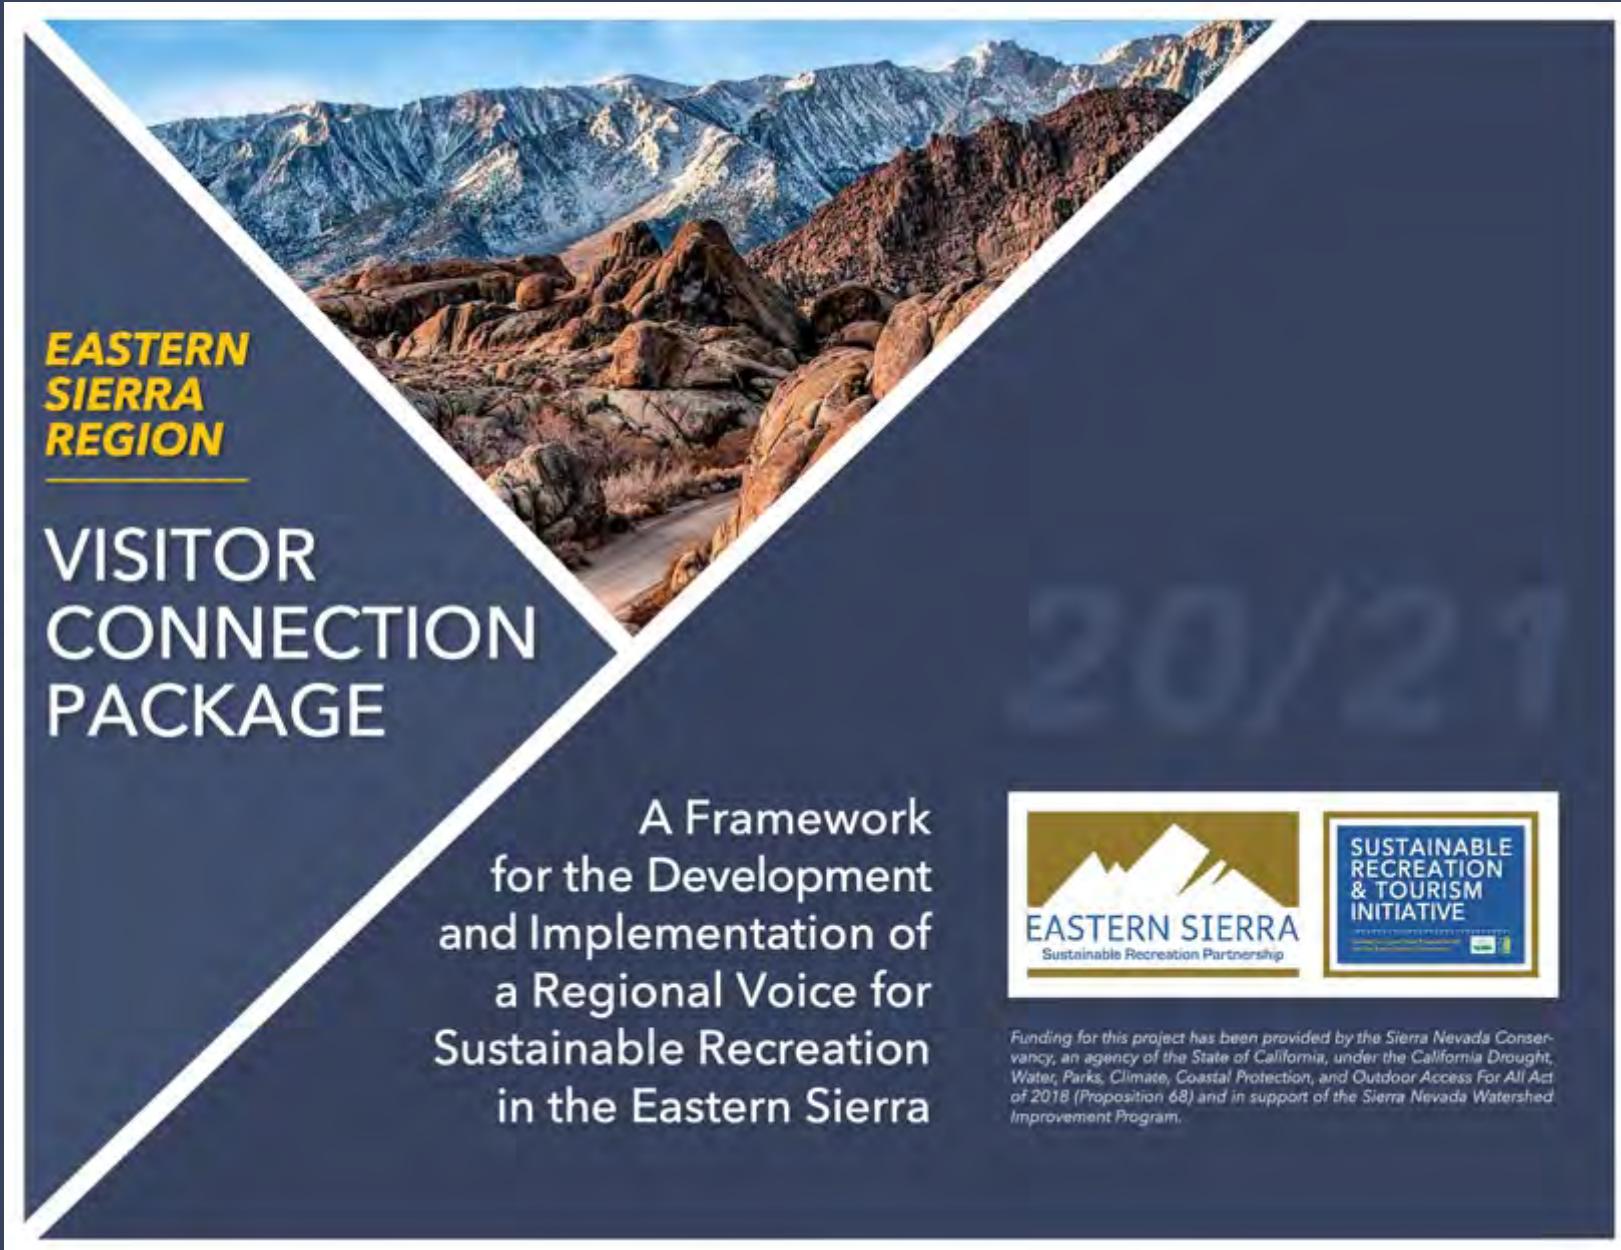

- Mono Basin Visitor Center in Lee Vining.
- Diaz Lake, just south of Lone Pine.

The schedule for the stations will be as follows:
Friday, August 29 - Monday, September 1
7:00 am - 5:00 pm

The goal of this pilot program is to develop a framework and test logistics for WID stations in 2026 in not only these two locations but possibly others.

The primary purpose of this initiative is to prevent the spread of Golden Mussels and other AIS. The Golden Mussel, which was first detected in the U.S. in California in October 2024, poses a significant and evolving threat to the region. These mussels have rapid growth rates, can colonize a wide range of surfaces, and have been known to clog vital infrastructure, including

The image shows the cover of the "Eastern Sierra Region Visitor Connection Package". The cover features a large photograph of a rugged mountain landscape with rocky terrain and a winding road. Overlaid on the left side is a dark blue triangle containing the text "EASTERN SIERRA REGION" in yellow, "VISITOR CONNECTION PACKAGE" in white, and a detailed description of the project's purpose in white. The right side of the cover has a dark blue background with the year "2021" faintly visible. At the bottom right, there are two logos: "EASTERN SIERRA Sustainable Recreation Partnership" and "SUSTAINABLE RECREATION & TOURISM INITIATIVE". A small paragraph at the bottom provides funding information.

Innovative Finance for National Forests Program

Project Description: On May 11, 2020, MLTPA was advised that a partnered grant application with the Inyo National Forest Foundation, Quantified Ventures, and the U.S. Endowment for Forestry and Communities was successful.

infrastructure, as local campgrounds are not needs of contemporary recreationists. The potential non-federal capital resources for improvements, and may serve as a replicable recreation infrastructure and capital improvements to public lands. Addressing the campgrounds' revenues from visitors, enhance revenues to communities, diversify business opportunities, and all while protecting natural resources and adapting and promoting resilience to climate change. On October 11, 2021, the [U.S. Endowment for Forestry and Communities](#) announced \$2.2 million in additional grant funding for eleven awards to support development of finance models that seek to leverage private sector capital to support resilience of the National Forest System and surrounding lands, and \$376,811 was awarded to [Quantified Ventures](#) to continue work on the Inyo National Forests Campground project.

PROJECT NARRATIVE

IPPF Project
Summary

The opportunity for the project was identified by Inyo NF staff in the fall of 2019. In February 2020, MLTPA submitted and was awarded an IPP Grant for the "Inyo National Forest Campgrounds Business Plan" project, USE-20-0068. In June 2021, Quantified Ventures submitted a follow-up application, "Financing Innovative Partnerships for Recreation Infrastructure," USE-21-0027, as an IPP Pilot project. During this phase, the Inyo NF awarded a permit to a private concessionaire, securing \$3 million in private financing for campground improvements. In fall 2024, Quantified Ventures concluded their participation in the project, with the understanding that MLTPA would complete the necessary technical drawings for a Pilot project involving six campgrounds, utilizing contractors hired through a State of California Sierra Nevada Conservancy (SNC) grant for "Eastern Sierra Campground Improvements." Both parties agreed that Construction Drawings were essential for identifying additional needed funding resources for a competitive bidding process to obtain bid campgrounds. This currently includes site surveys. A key component represented Great American Outdoors Act funds and most important step of administration and subsequent availability within the agency and funds. Alternative funding sources critical for attracting non-Federal partners.

IPPF Narrative Item:
Summary Notes

USFS staff have played vital roles and through the Pacific Southwest Forest Service staff regularly attend national Conservation Finance partnership capacity through a campgrounds are not generally considered authorized agency revenue unit capacity in deliveries.

Organizations have active project teams working with the Forest Service, has worked since 2019. To avoid potential conflicts, the project manager, Staff Officer, has been serving as a liaison between delivered Site Specific Environmental Assessments (LNEAs) and a campgrounds. Sixteen members have emerged Landscape successfully led public National Park Service in USFS policy making of app to NF capacity for Construction. However, the anticipated completion date is to unlock additional funding as to how the Inyo NF will respond.

8/23/25, 1:55 PM

MLTPA Campground Construction Documents - Grant Portal

IPPF Project

The six project campgrounds are managed by a concessionaire under a Granger-Thur Act special use permit. This authority allows for advance payment of improvement costs, "consolidated fee offsets", by the concessionaire against future revenues. The Inyo NF expects the permittee to contribute \$3 million to construction costs once this project's bid packages are complete. In addition, the expansion of the awarded Inyo NF concession permit includes seven additional fees for increasing revenue available for the campgrounds funded by the project to date, an additional \$500,000 value. The first pages and the signature page of the campgrounds concession permit, showing the facilities included and the permit terms, are included in this application as the "payoff letter of support." The balance of the permit includes confidential/proprietary information that cannot be shared publicly.

IPPF Financing Summary

Financing and/or upfront capital will not be required for this project.

IPPF Project

Six active campgrounds on the Inyo National NF have been identified to serve as the project's sites, including

MLTPA Sustainable Recreation Project

FS-1500-19 (VER. 05/24)
OMB No. 0596-0217
EXP: 05/31/2027

Justification for Modification

24-CS-11050400-006 Inyo Campground Improvement Project

Initial agreement funds: \$163,654 GAOA from FS, \$206,671 from cooperator

Modification funds: \$435,000 GAOA from FS, \$112,845 from cooperator

The cooperator has completed the initial scope items in this agreement to provide engineering surveys and schematic designs for the renovation of six Inyo NF campgrounds. These campgrounds are long overdue for redesign and renovation to meet the needs of current visitors and to improve resilience to natural disturbances like floods and wildfires. The modification will fund the next step in the project. The cooperator will prepare a construction document package and construction cost estimate ready for bidding.

If this modification is not approved, the six campgrounds will continue to degrade, deferred maintenance costs will continue to accumulate, and the public will be unable to fully access and enjoy their public lands due to the physical limitations of the campgrounds (such as: inadequate fire clearances, parking spaces too small for modern vehicles, not meeting accessibility guidelines, campsites too small for larger families, campsites not level or comfortable, restrooms outdated, and roads too narrow for RVs and emergency vehicles). **In addition, \$2,000,000-\$4,000,000 in new local economic activity will be forgone annually if the campgrounds are not upgraded and do not meet the needs of current visitors.**

Additional Scope Item

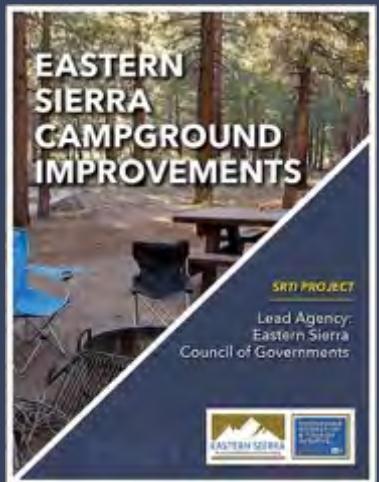

Mammoth Lakes Trails and Public Access Foundation (MLTPA) shall:

Hire, supervise, and manage a contracted landscape architecture firm that will provide a bid ready construction plan set and construction cost estimate for six campgrounds, based on the schematic designs provided in item B, that is ready for bid. Plan set to include: cover sheet, index, accessibility plan, demolition, layout and materials, dimensions and profiles, grading and drainage, restoration, details and notes.

Under the Redwoods: Sempervirens Fund Webinar Series

In this webinar series, Sempervirens invites experts and thinkers to join them to explore our magnificent redwood forests, what makes redwoods so special, why they thrive here and nowhere else in the world, and what they mean to us in our lives. **Webinars are the last Tuesday of each month (January - October) from 1 - 2 PM PT.**

Winter Wildlands Alliance Grassroots Advocacy Conference

September 11-14th, 2025

With climate disruption, agency underfunding, and mounting pressure on our public lands, this year's conference will explore how we can build more resilient, inclusive, and sustainable systems for the future. Expect dynamic workshops, engaging panel discussions, shared meals, and plenty of time for music and outdoor fun in the spirit of "summer camp for winter advocates."

Plotlines by Lindsay Gucker

Tracing the patterns of land, food, and community through the lens of farm design and culture.

Launched a month ago

PLOTLINES BY LINDSAY GUCKER

Why does a single peach cost \$2 at the farmers' market?

LINDSAY GUCKER:

AUG 02, 2025

This question undoubtedly pops into the minds of local farm stand customers as they salivate over the plump, blushed orbs carefully perched in baskets beneath a sign reading "\$10/quart." Eying each quart with a quick mental tally to see which basket overflows the most, the shopper discovers each juicy peach costs about \$2. At first glance, this price is hard to reckon with, but let's travel through the life of this peach to see if it's fair.

From High Desert to High Peaks

This peach, nestled among its fuzzy companions, finds itself in Mammoth Lakes, California, nearly 7,900 feet above sea level in the middle of July. It was picked by hard-working hands from a tree on a farm about 50 miles southeast, outside Bishop, California. The tree bearing this peach has been tended to for over a decade, using great care and organic practices to produce the succulent treats ready for harvest. In a single day, it was plucked from the tree, joined flats of other peaches, plums, and nectarines, carried to the harvest barn, and loaded into a van with other fresh produce for the 4,000-foot climb to the weekly summer farmers' market in Mammoth.
