REGULAR PARTNER MEETING

February 2, 2026

EASTERN SIERRA
Sustainable Recreation Partnership

REGULAR PARTNER MEETING

February 2, 2026

Recording in Progress

Public lands in the United States hold the creation stories, burial grounds, and ceremonies of Indigenous people who were killed or forcibly removed from their ancestral homes during territorial acquisition.

Many tribes, comprised of different bands, live in the Eastern Sierra region, caring for their native lands as they coexist with the ongoing impacts of colonization. Past or present tribes and bands associated with the region that this effort is aware of include, but are not limited to, the Miwok, Mono Lake Kutzadika'a, Mono/Monache, Nüümü (Paiute), Newe (Shoshone), Timbi-Sha, Utu Utu Gwaitu Paiute, and Washoe.

Two Nüümü terms describe the region and provide important context to ideas offered in this presentation. The first is Pamidu Toiyabe (Western Mountains), and the other, more widely known, place name is Payahuunadü (The Place Where Water Flows).

This acknowledgement is an invitation to all organizations, residents, and visitors to recognize the way this history has shaped the present as all parties work together in anticipation of a better future.

What is the ESSRP

"A public/public partnership between tribal, local, state, and federal government agencies and a regional voice for sustainable outdoor recreation in California."

What is the ESSRP

“A public/public partnership between tribal, local, state, and federal government agencies and a regional voice for sustainable outdoor recreation in California.”

John Wentworth
Eastern Sierra Sustainable Recreation Partnership

RE: Committee/Commission Appointment

Dear John,

At their January 6, 2026, meeting, the Alpine County Board of Supervisors adopted committee assignments for the Eastern Sierra Sustainable Recreation Partnership and Supervisor David Griffith was appointed as the Board's liaison to the Eastern Sierra Sustainable Recreation Partnership. Supervisor Griffith's address is P.O. Box 158, Markleeville, CA 96120; telephone 530-694-2168. Supervisor Evan ~~Mecak~~ was appointed as the alternate and his address is P.O. Box 158, Markleeville, CA 96120; telephone 530-694-2707.

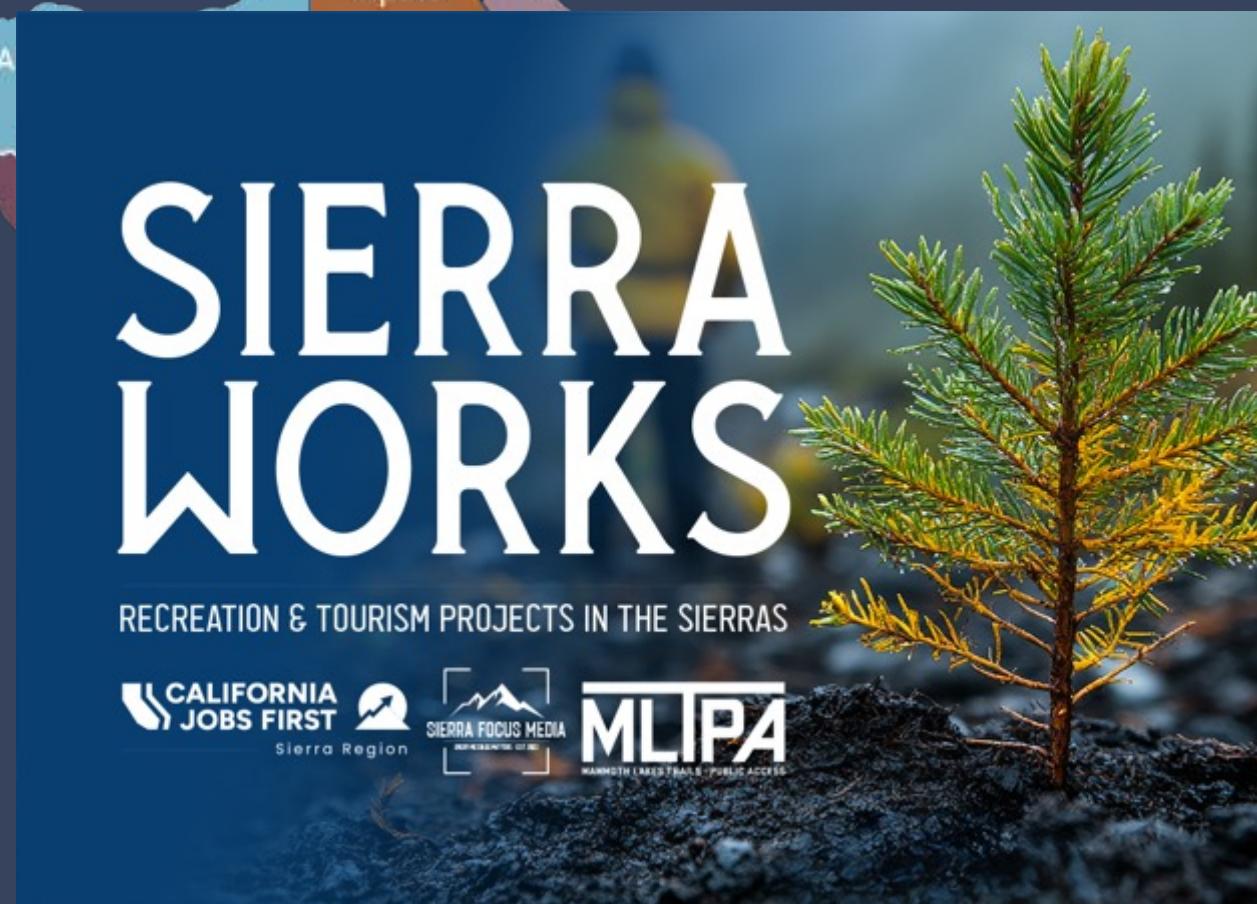

If you have any further questions, please do not hesitate to contact this office at the number/address below.

Sincerely,

michelle minder

Greetings

You're invited

to the first-ever Outdoors for All Convening, which will celebrate our shared progress in advancing equitable access, strengthen shared priorities, and spark new ideas to expand outdoor access to more Californians.

Tuesday, February 3 | 9:30 a.m. to 4:30 p.m.
California Natural Resources Agency Building
715 P Street, Sacramento

We look forward to welcoming you.
Please RSVP by Friday, January 16 to
outdoors@resources.ca.gov.

Gloria Sandoval
Deputy Secretary for Access
California Natural Resources Agency

[Join the Outdoors for All movement!](#)

Greetings

The screenshot shows the California Natural Resources Agency website. The top navigation bar includes links for Home, About, Departments, Initiatives, Connect, Grants, and Search. Below the navigation is a breadcrumb trail: Home | Initiatives | Outdoors for All. The main content features a large image of people at a beach. Overlaid on the image is the text "Outdoors for All" in large, bold, white letters. Below the image, a welcome message reads: "Welcome to Outdoors for All! We invite you to explore California's outdoors and support an Outdoors for All." A detailed paragraph explains the initiative's purpose: "California is known around the world for its iconic and beautiful outdoor spaces. Yet for too many Californians, these places, recreational activities, and their benefits remain out of reach. The State of California believes in the right of all Californians to have access to recreational opportunities, and to enjoy and protect the cultural, historic, and natural resources found across the Golden State." To the right of the text is the "Outdoors for All" logo, which features a stylized map of California in orange and blue, with three figures standing on top, and the text "OUTDOORS FOR ALL" in white and blue.

Outdoors for All

Welcome to Outdoors for All!

We invite you to explore California's outdoors and support an Outdoors for All.

California is known around the world for its iconic and beautiful outdoor spaces. Yet for too many Californians, these places, recreational activities, and their benefits remain out of reach. The State of California believes in the right of all Californians to have access to recreational opportunities, and to enjoy and protect the cultural, historic, and natural resources found across the Golden State.

Why is it important to prioritize time in the outdoors and safeguard these environments?

- Nature is critical for our physical, mental, and social wellbeing. Research shows that

Greetings

The image shows the California Natural Resources logo in the top left corner, featuring a stylized blue 'Z' icon and the text 'CALIFORNIA NATURAL RESOURCES'. To the right of the logo is a horizontal navigation bar with icons: a house, an information sign, a building, a pie chart, a document, a dollar sign, and a magnifying glass.

California Trails Survey

CA Climate Bond

CALIFORNIA TRAILS

CA CLIMATE BOND

• Nature is critical for our physical, mental, and social wellbeing. Research shows that

The main content area features a large, stylized graphic of a winding trail through a forest. Overlaid on this graphic is a circular logo for 'CALIFORNIA TRAILS'. The logo has a blue border and a white center. Inside the white center, the words 'CALIFORNIA TRAILS' are written in blue capital letters. Below this, in the green section of the logo, is a simple line drawing of a tree. The bottom half of the logo is a green circle with the text 'CA CLIMATE BOND' written in white, following the curve of the bottom edge. The background of the slide is a teal color on the left and a green landscape with a winding trail on the right.

Trail Work: Restoring the Paths and Stories of America's Public Lands

By Dillon Osleger

Mapping the past—and the future—of American trails.

In *Trail Work*, Dillon Osleger excavates the forgotten trails of the Western United States. He shows how one of the greatest infrastructure investments in the nation's history—paths through our public lands—has been rubbed away by time and deliberate neglect. Osleger unearths the wagon roads, water sources, trap lines, and Indigenous trading trails that once knitted the West together. He reveals centuries of path building, more than two-thirds of a nationwide network of trails and campgrounds, now erased from the map. Dwindling federal investment and privatized timber forests, ranches, and oil fields have blocked access to public lands, prompting Osleger to ask: How can we better care for the places that are claimed for the American public, but are too often abandoned or sold? Osleger has trail eyes like no other from his years as a trail builder, geologist, professional mountain biker, and public

A sinkhole developed along California Highway 2 in Wrightwood (San Bernardino County) on Wednesday.
Kyle Grillot/For the S.F. Chronicle

The Christmas week storms that slammed into California buried Tahoe in snow and a Southern California town in mud while knocking down trees, flooding roads and cutting power in many communities, but the Bay Area emerged Friday in fairly good shape — having dodged disaster but still watching for trouble.

More showers hit the Bay Area on Friday and were expected to linger into Saturday morning, though the most severe weather had subsided, meteorologists said.

Bob Gardner Federal Budget Updates – February 2, 2026

VICE CHAIR, Senator Patty Murray

BILL SUMMARY: Interior, Environment, and Related Agencies Fiscal Year 2026 Appropriations Bill

Bill rejects dramatic cuts proposed by Trump, House Republicans; delivers key funding for public lands, Tribes

Washington, D.C. – The Fiscal Year 2026 Interior, Environment, and Related Agencies Appropriations Act provides \$42.56 billion in total funding.

Key Points & Highlights – Protecting Public Lands

Public Lands: The bill rejects President Trump's efforts to shortchange America's cherished landscapes by ensuring that resources remain in place to fully support longstanding operations of the National Park System, the National Wildlife Refuge System, National Conservation Lands, and the National Forest System. The bill provides the funding necessary to maintain personnel at prior year levels, rejecting President Trump's efforts to entrench damaging staffing cuts, and requires the staffing levels necessary to be able to provide visitor services, facilitate Tribal consultation, ensure public safety, and carry out the science necessary to respond to growing natural threats and increased visitation.

National Park Service: The bill provides \$3.27 billion for the National Park Service, including \$2.87 billion for the operation of the National Park System, which is \$1.15 billion higher than the level requested by President Trump. The bill provides the resources to sustain fiscal year 2024 staffing levels and provides the funding necessary to support a full complement of seasonal staff during fiscal year 2026. The bill also provides \$205 million for the Historic Preservation Fund, including specified funding of \$23.75 million for Tribal Historic Preservation Offices and \$62.15 million for State Historic Preservation Offices. The bill provides funding typically allocated for Line Item Construction Projects with funding for park repairs, while awaiting information about specific construction projects that are shovel-ready.

Forest Service: The bill provides \$6.13 billion for the Forest Service, excluding additional funding for the Wildfire Suppression Operations Reserve. Of this amount, \$3.7 billion is provided for the Forest Service's non-wildland fire management responsibilities—providing sufficient funds to sustain appropriate staffing levels. The bill rejects the steep \$1.4 billion cut to the Forest Service's non-fire budget proposed by President Trump. The bill provides funding for the Forest Service to improve forest restoration and fire risk reduction efforts on federal lands and through cross-boundary

Coming in March: 2024 Outdoor Recreation Economy Statistics

BEA will release statistics on Thursday, March 5, at 10 a.m. showing the role that outdoor recreation – pursuits like bicycling, RVing, and fishing – plays in the U.S. economy and each state's economy.

The annual statistics for 2024 will include measures of outdoor recreation activities' contributions to gross domestic product (GDP), also known as the activities' value added, for the nation, states, and the District of Columbia. The statistics also include employment and compensation by industry for the U.S. and states, as well as gross output by industry and activity at the national level.

BEA's state and national data on outdoor recreation informs decisions by businesses, policymakers, and managers of public lands and waters. The *Outdoor Recreation Satellite Account* stems from a 2016 federal law.

On Today's Show:

johnwentworth@mltpa.or Subscribe

The Secretary of the Interior officially announced today the creation of the United States Wildland Fire Service. Effective today, the transition period begins, and the unification of wildfire resources within the Department starts.

The Department provided transition plans, framework, and authorities of the new Service, which I cover in full.

Unification of assets, budgets, IT services, and payroll is underway, along with streamlining overhead structures and fully aligning pay structure, position descriptions, and retirement benefits.

A big day for the new United States Wildfire Service.

United States Wildland Fire Service Launches New Logo Contest For Wildfire Employees.

THE HOTSHOT WAKE UP
JAN 23, 2026

36 2 3 Share ...

The USWFS, under the Department of the Interior, has launched a contest for wildfire employees to create the new logo for the Service. Director Fennessy issued a note this week, welcoming employees to submit their own entries. Most of the crew logos you see on t-shirts for Hotshots, Engines, Helitack, Smokejumpers, and more were created by a crewmember.

There are some pretty sweet crew logos out there.

So, in continuing this tradition, the USWFS is opening the creation of its new logo to the workforce's creative minds.

Transfer of the Forest Service to Interior? Evergreen, Mike Lee, and Andy Kerr

January 6, 2026 by Sharon

Evergreen had a piece today by Jim Petersen called "the Death of the Forest Service." Apparently,

Here's the backstory as we know it

A draft copy (RYA25627 4 KV) of Senator Lee's proposed legislation arrived in our inbox on January 3. The original reportedly circulated on October 9, but it wasn't shared with us at that time.

We don't know who is sharing it now, but it appears to have come from someone within the Senate Legislative Counsel.

The five-page draft—which appears to be a work in progress—is titled:

Reorganization of the Forest Service Under the Department of the Interior

That title is misleading.

- Yesterday, USDA Leadership announced plans to move the Forest Service leadership and senior staff from D.C. to Salt Lake City.
- This is part of the reorganization plan, which will phase out the 9 Regions and create five hubs. This still all hinges on Congressional approval.
- Senators penned a letter to Forest Service Chief Schultz requesting clarification on hiring numbers, staffing, prescribed burns, and fuel mitigation numbers.
- They have nine specific points they want answered by December 12th of this year.
- The inaugural Director of the USWFS.

USDA reorganization fight tests congressional backbone

Lawmakers' bid to slow the closure of the department's largest research facility rests on iffy legal ground but waves a yellow flag at the Trump administration.

BY: MARC HELLER | 12/09/2025 06:30 AM EST

Congress is attempting to use the power of the purse to prevent the closure of the Department of Agriculture's Beltsville Agricultural Research Center. | Jacquelyn Martin/AP

E&E DAILY | Congress is threatening to use its power of the purse to save a key Department of Agriculture research lab. But that may be little more than bluster in the eyes of the Trump administration.

Deep in the spending package that ended the 43-day government shutdown, Congress inserted a few lines forbidding USDA from using appropriated funds to close or consolidate research facilities — a provision aimed mainly at the department's 6,000-acre flagship Beltsville Agricultural Research Center in Maryland — without approval from the House and Senate Appropriations

BLM revives Western states liaison job as part of staff reshuffling

Several top Bureau of Land Management senior staffers also are taking jobs as acting state directors.

BY: SCOTT STREATER | 12/09/2025 04:10 PM EST

A Bureau of Land Management sign in Washington. | Francis Chung/POLITICO

E&E NEWS PM | The Bureau of Land Management is filling a top position created by the Biden administration that serves as a liaison between the agency and Western governors, senior bureau officials confirmed Tuesday to staff.

Sharif Branham, who currently heads the resources and planning directorate, is being reassigned as acting assistant director of the intergovernmental and external affairs directorate. The position was removed from the [BLM leadership page](#) and not filled after the former assistant director, [John Gale](#), left BLM in May.

Reviving the liaison role is part of a senior staff reshuffling that BLM staff began learning about on Monday and also involves several other senior program directors and state office directors.

Happenings of Interest – Federal Updates

USDA REORGANIZATION
SUMMARY AND ANALYSIS OF FEEDBACK
December 8, 2025

Overview

On July 24, 2025, the U.S. Department of Agriculture (USDA) proposed a reorganization to refocus its core operations on supporting American agriculture, producers, ranching, and forestry, structured around four pillars: workforce alignment, proximity to customers, bureaucracy reduction, and consolidation of redundant functions. A public comment period was open from August 1 through September 30, 2025. Comments were requested via email to reorganization@usda.gov and open to all interested parties.

This report synthesizes feedback from over 46,845 emails across a variety of stakeholder groups including employees, Congress, tribes, state and local governments, unions, non-profit organizations, educational institutions and citizens. While USDA received a total of 46,845 messages in the reorganization@usda.gov, approximately 14% were duplicative messages, had no text or were spam and marketing emails. Of the 86% of messages remaining, 43% were from duplicative senders. Form-letters or campaign emails comprised 68% of the total messages received.

USDA categorized and analyzed emails received based on sender type and content. Because of the large volume of form and campaign emails, separate analysis was conducted on unique emails versus the entirety of feedback received. The remainder of this document outlines the top themes or concerns and recommendations for each category of feedback. Examples of the most prevalent form letters received are included in the appendix.

Overall Summary of Feedback Excluding Form/Campaign Letters

This dataset comprises over 14,000 public comments submitted during the USDA reorganization proposal review period that were not form or campaign emails. The overwhelming majority of comments (82%) expressed negative sentiment. Five percent expressed positive sentiment and 7% expressed neutral sentiment. A majority of emails were general comments about the USDA Reorganization (53%) followed by the United State Forest Service (USFS) (27%) and Agricultural Research Service (ARS) Beltsville Agricultural Research Center (BARC) (10%).

Key Themes

- **Safeguarding the Forest Service Mission:** Comments frequently warned that reorganization would erode the Forest Service's capacity to manage public lands and resources. Stakeholders fear that centralized oversight and budget cuts could compromise ecological management, public access, and employee morale.
- **Loss of Local Oversight and Expertise:** Concerns that reorganization would replace localized knowledge with top-down management, risking misalignment with regional needs. Critics argue that rural and natural resource communities require tailored approaches, which centralized structures may fail to deliver.

WGA on Forest Service Reorganization: What Do You Think of State Directors? And Their

Recommended
Comment
Considerations

I'm always on the lookout for partisan views submerged under the media sea of our policy issues. One place I look for a nonpartisan view is the Western Governors Association (WGA). They have to agree across partisan divides, and (in my view) tend to be more pragmatic about solutions than national figures, perhaps based on their direct experience with managing agencies, finding common ground and trade-offs within the state, and the complex world of implementation.

Happenings of Interest – Federal Updates

Regarding the U.S. Forest Service (USFS), the elimination of the regional offices could result in a substantial communication gap between the agency and its partners, who play an increasingly important role in collaborative forest management and shared stewardship agreement implementation. Western Governors encourage you to consider establishing state directors, replicating the model employed by USDA-RD, FSA, and NRCS. The Bureau of Land Management (BLM) also uses this model, and its efficacy is proven. BLM maintains state directors in nine separate western states, two shared state directors for five western states, and one director for eastern states.

Establishing a state director framework for USFS would ensure strong communication between the agency and states and promote improved collaboration on forest and rangeland management, recreational use, and wildfire mitigation and response. It would also provide a strong local resource for coordinating activities under the Shared Stewardship Agreements executed between states and the USDA.

AGREEMENT FOR SHARED STEWARDSHIP OF CALIFORNIA'S FOREST AND RANGELANDS

Between the
STATE OF CALIFORNIA
And the
USDA, FOREST SERVICE
PACIFIC SOUTHWEST REGION

This MEMORANDUM OF UNDERSTANDING (MOU) is hereby made and entered into by and between the State of California, hereinafter referred to as "the State," and the United States Department of Agriculture (USDA), Forest Service, Pacific Southwest Region, hereinafter referred to as "the U.S. Forest Service" and together referred to as "The Parties."

TITLE: Agreement for Shared Stewardship of California's Forests and Rangelands

PURPOSE:

This MOU establishes a joint framework to enhance science-based forest and rangeland stewardship in California. The U.S. Forest Service and the State of California commit to maintain and restore healthy forests and rangelands that reduce public safety risks, protect natural and built infrastructure, and enhance ecological habitat and biological diversity. The Parties agree to develop shared tools, coordinated processes, and innovative approaches to increase the pace, scale, and effectiveness of forest and rangeland stewardship in California.

The U.S. Forest Service and the State of California, through the California Natural Resources Agency, make this commitment in accordance with the following provisions.

STATEMENT OF MUTUAL BENEFIT AND INTERESTS:

Restoring healthy forests and rangelands in California will yield both ecological and community benefits. Healthy forests will improve climate resilience and reduce the risk of catastrophic wildfire, safeguard water quality and air quality, protect fish and wildlife habitat, enhance biological diversity, sequester carbon, improve recreational opportunities, and generate good jobs and economic opportunities.

BACKGROUND:

Home to some of the largest, tallest and oldest trees in the world, rich biological diversity, vast watersheds, and spectacular recreation, the grandeur of California's wildlands has captivated generations. California's forests naturally adapted to low-intensity fire, nature's preferred management tool, but Gold Rush-era clearcutting followed by a wholesale policy of fire suppression resulted in the overly dense, ailing forests that dominate the landscape today.

Compounding risks have made it nearly impossible for nature to self-correct. A cycle of catastrophic wildfires, longer fire seasons, severe drought, intense wind, tree mortality, invasive species, and human population pressure threaten to convert conifer forests to shrublands and shrublands to invasive grasses.

wood supply will be available. The Parties will work with stakeholders to develop additional supply signal tools to guarantee multi-year supply contracts and incentivize new investments in wood processing facilities in California.

7. **Improve Access to Sustainable Recreation:** Foster a range of forest and wildland opportunities that reflect the needs of and better serve California's diverse population. The Parties will pursue mission-appropriate and sustainable recreation opportunities in ways that leverage resources and extend capacity through partnerships and alignment around a shared vision of access and diversity. Examples include improved transportation opportunities, more affordable lodging options, increasing accessible trails and facilities, and targeting low income communities that lack access.
8. **Fire-Adapted Communities:** Identify and protect communities most vulnerable to fire impacts. These vulnerability factors include proximity to high fire risk, communities without good ingress or egress corridors and socioeconomic factors that hinder evacuation such as age or car ownership. The Parties will work together to improve fire suppression and fire prevention capabilities that safeguard communities, including but not limited to, these vulnerable populations.
9. **Advance Science and Share Monitoring and Data Analytics:** Leverage scientific expertise and capacity to maintain healthy and resilient forests in a changing climate. Coordinated data will enable stakeholders to adapt priorities and management techniques to the dynamics of California's changing ecosystems. The Parties will:
 - a. **Consolidate Data:** Consider co-locating data teams from State and Federal agencies to reduce redundancy and improve efficiency. Establish joint monitoring methods, joint protocols, and work on developing a single, statewide shared data set that all Parties can utilize and update.
 - b. **Ecological Monitoring:** Consistently monitor forest health, carbon sequestration, biological diversity, watershed quality, and other parameters that impact forest and wildlands in California. The Parties will coordinate closely with environmental organizations and universities to ensure monitoring techniques are addressing the most current ecological concerns.
 - c. **Research and Innovation:** Support long-term research and monitoring efforts. Enhance surveying and monitoring programs such as the Forest Inventory and Analysis program with joint funding contributions, allowing a greater number of monitoring installations to be remeasured more frequently.

MUTUAL UNDERSTANDING AND AGREEMENT BETWEEN THE PARTIES:

- A. The Parties are bound by all applicable federal, state, and local statutes and regulations. If conflicts arise, the Parties will evaluate how authorities can best achieve the goals of a project.

'Fantastic' rally exposes Trump's limits as green stocks soar

Capital has continued to flow into renewables. The S&P equity index tracking clean energy has soared 64 percent over the past year.

BY: BLOOMBERG | 01/27/2026 06:13 AM EST

CLIMATEWIRE | The manager overseeing Janus Henderson Investors' flagship sustainable fund says there's little to indicate that President Donald Trump's anti-green rhetoric will derail the rally gripping clean-energy stocks.

"Last year was a perfect example," says Hamish Chamberlayne, head of global sustainable equities and a portfolio manager at Janus Henderson. "Everyone was worried" that Trump's return to the White House would spell the end of renewables. Instead, "it was a fantastic year for renewable energy stocks," he said in an interview. Chamberlayne, who runs the \$2.4 billion Janus Henderson Global Sustainable Equity Fund, says he now regrets he wasn't bolder in piling capital into the rebound that gripped green stocks in 2025.

"I wish we'd invested even more in it," he said. And going forward, "we still see a very strong investment environment for renewable energy." That's as the main S&P index tracking clean energy stocks is on track for its best January since 2019.

Trump kicked off his second term by signing [executive orders](#) designed to eradicate ESG and DEI. His administration has followed through on those threats with efforts to block offshore wind projects and by ending tax credits that had supported the low-carbon economy. And at this year's meeting of the rich and powerful in Davos, organizers [agreed to downplay climate change](#) in order to get Trump to attend.

But capital has continued to flow into renewables. The main S&P equity index tracking clean energy has soared 64 percent over the past 12 months. An S&P index tracking oil stocks, meanwhile, has added about 13 percent in the period while the broad S&P 500 Index is up 15 percent. Green equities have gained as investors bet demand for electricity will keep rising amid a broader electrification trend that favors renewables.

Trump withdraws US from key climate treaty and dozens of other groups

8 January 2026

Danny Aeberhard, Rachel Hagan and Matt McGrath, environment correspondent

Share ▾ Save ▾

US President Donald Trump has withdrawn the US from dozens of international organisations, including many that work to combat climate change.

Nearly half of the 66 affected bodies are UN-related, including the Framework Convention on Climate Change - a treaty that underpins all international efforts to combat global warming.

Groups working on development, gender equality and conflict - areas the Trump administration had repeatedly dismissed as advancing "globalist" or "woke" agendas - are also included.

The White House said the decision was taken because those entities "no longer serve American interests" and promote "ineffective or hostile agendas".

E&E DAILY

Carbon trade measure slips into spending package

Language from the "PROVE IT Act" was incorporated into funding legislation President Donald Trump signed into law last week.

BY: AMELIA DAVIDSON | 01/27/2026 06:40 AM EST

Sens. John Curtis (R-Utah) and Kevin Cramer (R-N.D.) on Capitol Hill. Both have championed the "PROVE IT Act." | Mark Schiefelbein/AP

E&E DAILY | Congress quietly adopted a much-touted carbon trade bill last week, tucking the measure into a spending package to fund energy and environment agencies.

The "Providing Reliable, Objective, Verifiable Emissions Intensity and Transparency (PROVE IT) Act" - from Sens. Kevin Cramer (R-N.D.), Chris Coons (D-Del.) and John Curtis (R-Utah) - would have the administration study the carbon intensity of American manufacturing to show it compares favorably with other countries.

Inyo National Forest seeking public input on OHV grant applications, March 3 to May 4

BISHOP, Calif., Jan. 26, 2026 - The Inyo National Forest welcomes public input to develop grant applications for the [California State Parks Off-Highway Motor Vehicle \(OHV\) Recreation Division Grant Program](#) recreation funds.

Grants support priority motorized trail maintenance activities and are key to ensuring the U.S. Department of Agriculture's Forest Service provides public access to motorized recreationists across the state.

The Forest Service is soliciting public input to reflect the needs of recreation users as we move forward with the next round of grant proposals.

Public comments may be submitted for consideration by:

- Reviewing preliminary grant application at olga.ohv.parks.ca.gov/egrams_ohmr beginning March 3 through May 4.
- **Public Meeting | Feb. 25, 5:30-6 p.m.**
 - [Inyo National Forest OHV Grant Public Meeting | Meeting-Join | Microsoft Teams](#)
 - +1 323-886-7051 United States, Los Angeles
 - Phone conference ID: 878 309 645#
- **Stakeholder Meeting | Feb. 25, 6:15-6:45 p.m.**
 - [Inyo National Forest OHV Grant Stakeholder Meeting | Meeting-Join | Microsoft Teams](#)
 - +1 323-886-7051 United States, Los Angeles
 - Phone conference ID: 276 307 5#

Forest staff will consider the public comments received as they develop the final grant application for submission in June.

To request more information, contact: Adam Leidy, Adam.Leidy@usda.gov

For additional information about the Law Enforcement grant, contact: Law Enforcement Patrol Captain Laura James, Laura.James@usda.gov

Eastern Sierra Visitor Connection Program

Digital Campaign Implementation

April 2024 – December 2025

To: Whitebark Institute

From: The Mammoth Lakes Trails and Public Access Foundation (MLTPA Foundation)

Executive Summary

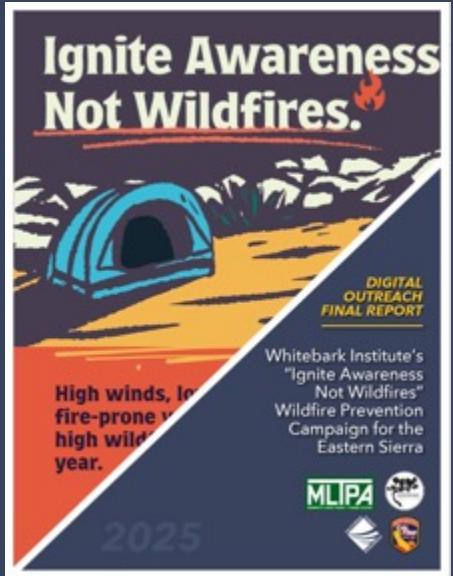

This 22-month electronic/digital media project covered two “fire seasons” including an abbreviated campaign in 2024 and the robust “Ignite Awareness Not Wildfire (IANW)” campaign in 2025. These efforts delivered a combined total of at least **571,117 impressions**.

Fire Season 1 in 2024 was a limited effort with a shortened timeframe, involving 9 partners, and served as an excellent opportunity to set up, test systems, and revise plans as needed.

Fire Season 2 debuted the IANW campaign in 2025, featuring a strong visual design combined with carefully vetted messaging. Outside of the digital efforts, Whitebark Institute supported IANW with extensive in-person and physical outreach, including printed materials such as posters, flyers, stickers, coffee sleeves, and firewood bundle inserts, as well as billboards, event participation, and more. The branded campaign website served as a central resource hub for partners and visitors seeking additional information.

Partners were enthusiastic about the IANW campaign, and a total of 16 partners shared content independently 80 times during the period. Additionally, partners requested to be included in collaborative posts created on the “Eastern Sierra Sustainable Recreation” accounts. These accounts, which MLTPA staff created in 2019, were originally developed to promote sustainable recreation in the Eastern Sierra as part of the “Sustainable Recreation and Tourism Initiative”.

MLTPA Sustainable Recreation Projects

OVERVIEW

The Ignite Awareness Not Wildfires (IANW) campaign was launched in May 2025 by the Whitebark Institute with funding from CAL FIRE's California Chapter of the National Fire Prevention Grants Program. The campaign was designed to increase wildfire prevention awareness among visitors to the Eastern Sierra through coordinated digital and on-the-ground outreach.

A core component of the initiative was a nearly eight-month digital media campaign, managed by the MLTPA Foundation, which ran from May through December 2025. Using a work plan developed by the Visitor Connection Working Group (VCP) and originally developed by the Sierra Nevada Coalition, the MLTPA Foundation engaged local partners to help share campaign materials and broaden outreach. In keeping with this work plan, a new website developed (ignitewildfires.org) to quickly and easily share campaign assets with regional partners. This coordinated approach provided a consistent and wide-spread delivery of the established wildfire prevention messaging, ensuring a unified and comprehensive visitor education effort across the Eastern Sierra.

The digital outreach effort described in this report represents one component of the broader "Ignite Awareness Not Wildfires" campaign. While the overall campaign included multiple elements, this report focuses exclusively on the digital outreach activities conducted by the MLTPA Foundation in partnership with regional organizations from May through December 2025.

WORDS FROM OUR PARTNERS

BISHOP AREA CLIMBERS COALITION

"As a volunteer organization with a deep love for climbing, stewardship, and education, we highly value having vetted, sustainable messaging encouraging visitors to take action. This campaign did an excellent job of showcasing consistent stewardship messaging alongside other local organizations."

— SAVANNA DIEDER, SOCIAL MEDIA DIRECTOR, BISHOP AREA CLIMBERS COALITION

VISIT MAMMOTH

"Stewardship and collaboration are just a few of our core values at Mammoth Lakes Tourism, so partnering with the Whitebark Institute, Eastern Sierra Coalition, and the Working Group was a natural fit for our business in. The Ignite campaign assets were thoughtfully built with stewardship and sustainability in mind, which made it easy for us to activate consistent messaging and encourage action. We are so grateful to have these assets on our website. With summer approaching at the time of launch, the campaign was perfectly timed. Wildfires and campfire awareness needed to be a main focus, and the Ignite campaign helped us achieve exactly that."

— SAMANTHA LINDBERG, SENIOR MARKETING MANAGER, MAMMOTH LAKES TOURISM

朋友们对 the INYO

"The Ignite Awareness Campaign has made it effortless to share the simple things anyone can do to prevent the catastrophic wildfires we know all too well. It's been of tremendous value when educating visitors and locals alike on how to respect the land and practice sustainable recreation."

— JORDAN MARSHALL, COMMUNICATIONS MANAGER, FRIENDS OF THE INYO

TAKEAWAYS FROM WHITEBARK INSTITUTE & MLTPA FOUNDATION

WHITEBARK INSTITUTE

"Wildfire impacts all of us across the Eastern Sierra, a reality made abundantly clear by the many close calls and profound losses of recent years. Small, simple actions can lead to meaningful changes that reduce the risk of devastating wildfires within the communities and landscapes we live in."

By working together through regional collaboration and shared messaging, we can inspire visitors to explore this landscape with respect, understanding, and intention. The Eastern Sierra welcomes a diverse range of visitors and we are grateful for their role in respecting them. With joint effort, we are building a safer, more resilient future for our communities, landscapes, and livelihoods."

— LAURA WENTWORTH, EXECUTIVE DIRECTOR, WHITEBARK INSTITUTE

MLTPA FOUNDATION

"MLTPA's collaboration with Whitebark and the Ignite Awareness campaign originates from the Visitor Connection Working Group and the Eastern Sierra's Sustainable Tourism and Tourism Working Group in 2020. After eight years of work, the Working Group moved on a determined mission to establish a regional voice for the Eastern Sierra. The 2023 "ignite Awareness" Campaign was the first fully funded initiative by the Working Group and its partners. We are thrilled with the results, and we're looking forward to the next one."

— JOHN WENTWORTH, BOARD PRESIDENT, MLTPA FOUNDATION

INSPECT REGULARLY

Loose chains can create sparks that ignite dry grass and vegetation.

Regularly check trailer chains to ensure they are properly in place and not dragging on the ground.

SECURE PROPERLY

Securely fasten trailer chains before driving, especially in fire-prone areas.

Follow manufacturer guidelines for installation.

EASTERN SIERRA FIRE TIPS

did you know...

ignitions of road-side fires can occur by direct contact of metal and pavement due to dragging trailer chains and metal parts.

[FOLLOW TIPS TO PREVENT IGNITIONS](#) 

As we welcome friends to our region for the annual splendor of Fall colors, we wanted to share tips and precautions that can be taken to support fire safety.

Thank you for being a part of our community!

#RecreateResponsibly
#VisitBishop

STAY ALERT

If you hear unusual noises or feel vibrations while driving your trailer, pull over to inspect your chains.

Fix any issues immediately to prevent fire risks.

Ignite Awareness, Not Wildfires

IGNITE ADVENTURE. IGNITE RESPECT. IGNITE CONNECTION.

IGNITE AWARENESS NOT WILDFIRES

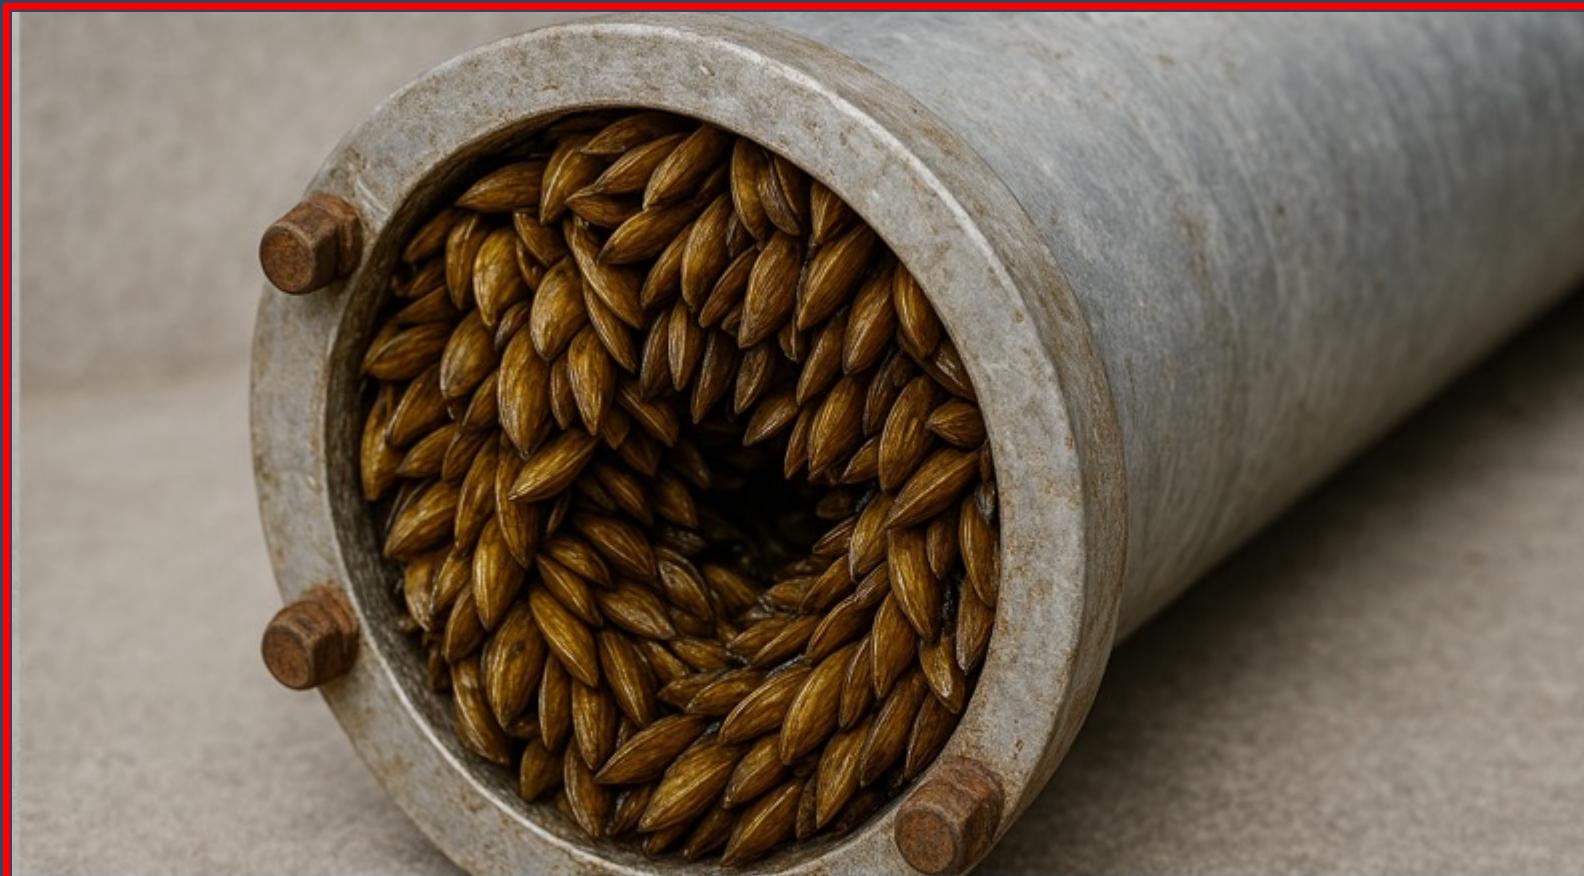

As climate change drives longer, more intense fire seasons, raising awareness of our wildfire risk has never been more critical. Even a single preventable fire can threaten the communities, ecosystems, and cherished landscapes that define the Eastern Sierra. While natural and prescribed fire play an important role in many of our ecosystems, an accidental ignition could put everything at risk.

Dive in, get informed, and be part of the solution.

INTRODUCTION TO REGIONAL GOVERNANCE

Chapter 4 Foundational Element Sustainable Recreation & Tourism Strategy 1

Public Lands Partnership Agreements

Strategy 1: Enhance access to sustainable recreation and tourism on public lands to expand economic opportunities by creating partnership agreements between local authorities and federal, state, and utility land managers.

Regional Strategic Plan – pg. 76

Sierra Jobs First: Recreation & Tourism Working Group

Meeting #1 – Breakout Groups + Data Collection

BREAKOUT GROUPS

Room 1: Does it make sense to draft a mission statement for a regional entity or several 'regional entities' and, if so, what might be in that mission statement?

Room 2: How might a "regional recreation entity" play a role in expediting project development, with each or any of the following: Federal government, state government, county government, and/or local government.

Room 3: Based on what you've heard from the two projects, how should the recreation/tourism sector work with tribes to partner/move forward with work in this region?

Room 4: What are the most important and practical components of a regional recreation and tourism governance structure to most benefit the sector?

Room 1: Does it make sense to draft a mission statement for a regional entity or a number of 'regional entities' and, if so, what might be in that mission statement?

Do you support the creation of a regional recreation entity?

What 1-2 words would you like to see represented in a regional recreation entity's mission statement?

What do we want to avoid in a mission statement?

Room 2: How might a 'regional, state/government entity play a proactive role in expediting project development with each or any of the following:

Federal government, state government, county government, local government, for a regional recreation governance entity?

What Challenges May Exist?

Room 3: Based on what you've heard from the two projects, how should the recreation/tourism sector work with tribes to partner/move forward with work in this region?

What ideas do you have for strengthening tribal relations and NGO/nonprofit partners?

Room 4: What are the most important and practical components of a regional recreation and tourism governance structure to most benefit the sector?

What do we want to avoid in the development of a regional recreation and tourism governance structure?

How do we overcome challenges when there are competing interests?

Room 1: Does it make sense to draft a mission statement for a regional entity or a number of 'regional entities' and, if so, what might be in that mission statement?

What ideas do you have for strengthening tribal relations and NGO/nonprofit partners?

Room 2: What are the most important and practical components of a regional recreation and tourism governance structure to most benefit the sector?

Based on the project presentations, what should this entity NOT do?

INTRODUCTION TO INVENTORY ASSET MAPPING

Strategy 1: Enhance access to sustainable recreation and tourism on public lands to expand economic opportunities by creating partnership agreements between local authorities and federal, state, and utility land managers.

ACTION STEP 2

Through a regional collaborative governance structure consistent with partnership agreements, identify efficient pathways to create plans and establish policies to reflect regional priorities.

- a. Create regional sustainable recreation plans by identifying assets, gaps, partners, and implementation strategies with land managers.
- b. Prioritize tribal engagement.
- c. Attract and develop partnerships with recreation/entertainment/resort organizations, including the California Outdoor Recreation Partnership.
- d. Work with the film industry and local film commissioners/visitor bureaus.

ACTION STEP 3

Identify efficient pathways to implement regional plans and priorities through a regional collaborative governance structure consistent with partnership agreements.

- a. Establish agreements between land managers and the full suite of regional capacities in anticipation of implementation efforts.
- b. Identify implementation opportunities for recreation infrastructure and service gaps that will increase capacity through business expansion and job training in sustainable recreation, ecosystem services, and agritourism. This includes project planning and permitting and implementation of recreation infrastructure, including trails, restrooms, trash collection, campsites, permittees, outfitters, guides, etc.

Regional Strategic Plan – pg. 76

Data Analysis + Recommendations Prep

Standardized Code	Code	Key Findings/Note	Source
LOCAL-LED	Organic & Bottom-Up	The creation process should arrive organically as shared priorities are identified.	BR 1
LOCAL-LED	Organic & Bottom-Up	The mission statement and structure should percolate from the ground up.	BR 1
LOCAL-LED	Organic & Bottom-Up	Making sure the real driver is at the community level, and not another outside entity imposing control.	BR 1
LOCAL-LED	Organic & Bottom-Up	Emphasis on the entity being born from local groups and the community level.	BR 1
GOVERNANCE-AVOID	Avoid Central Control	The entity must avoid heavy-handedness or being imposed from the outside or top-down	BR 1
FEASIBILITY	Realistic & Focused	Focus on keeping this realistic and grounded (e.g., words to describe function: "Realistic & grounded").	BR 1
FEASIBILITY	Realistic & Focused	Avoid being too granular.	BR 1
FEASIBILITY	Realistic & Focused	Avoid aiming too high, ensuring the mission statement is attainable.	BR 1
FEASIBILITY	Realistic & Focused	Start small from the beginning.	BR 1
FEASIBILITY	Realistic & Focused	Concern that defining the mission statement is too early in this process.	BR 1
FEASIBILITY	Realistic & Focused	Avoid trying to do too much all at the same time.	BR 4
EFFICIENCY	Leverage & Efficiency	Leverage existing tools (data, planning capacity) so funds are not exhausted to recreate the wheel.	BR 1
EFFICIENCY	Leverage & Efficiency	Avoid duplicative efforts (e.g., concerning SNA's existing work).	BR 1
EFFICIENCY	Leverage & Efficiency	Need to ensure the feedback loop between efforts is efficient and not duplicative.	BR 1
CUSTOMIZATION	Embrace Uniqueness	Maintain consistency while embracing the uniqueness of each community.	BR 1
CUSTOMIZATION	Embrace Uniqueness	The entity must support & listen, adapting to each county's culture & needs.	BR 1
INFORMAL	Governance as Outcome	Regional governance should be an outcome, with an emphasis on informal coordination.	BR 4
CONVENE	Break Silos & Network	Must break silos by doing deep listening to all partners.	BR 4
CONVENE	Break Silos & Network	Core function is simple info sharing/relationship building that remote counties feel is valuable.	BR 4
CONVENE	Break Silos & Network	Get to know all sectors and identify opportunities to coordinate.	BR 4

 Sierra Region

Recreation & Tourism Working Group Meeting Recaps
Updated: January 26th, 2026

Asset Mapping
January 20th

Presenting Projects:

- Eastern Sierra Regional Trail System and Jobs Creation: MLTPA
- Eastern Sierra Regional Campground Improvements & Jobs Creation: MLTPA

High-Level Recap:

- Participants emphasized that primary function of the asset mapping exercise is to catalog the existing resources for the creation of a possible unified regional ecosystem.
- The current siloed nature of funding/data prevents assets from reaching their full economic potential. More coordination is desired by participants.
- Move towards a dynamic regional service layer that integrates human capital, technical tools, and cross-jurisdictional funding methods.

Key Functions // Actions for Asset Mapping:

- Align Funding with Regional Realities: Transition from localized/county-line spending toward regional models (e.g. ESSRP) that allow resources to flow where the impact is greatest.
- Issue-Based Coordination: Organize stakeholders around specific challenges, (e.g. workforce housing or trail infrastructure) to eliminate administrative duplication.
- Institutionalize Stability: Demonstrate institutional longevity and ground-level engagement.
- Technical Literacy: Bridge the digital gap and modernize grant writing and project management.

Top Five Immediate Priorities for Asset Mapping:

- Centralized GIS Inventory of Physical Assets
- Public-Public Partnership Scaling
- Technical Capacity Building
- Private Investment Incentivization
- Workforce Pipeline Integration

Tensions That Must Be Addressed:

- Data Sharing vs. Data Security: Balancing the need for a transparent, centralized regional database with the privacy and proprietary concerns of individual organizations.
- Regional Vision vs. Local Burden: Addressing the burden on local staff who must balance high-level regional planning with the day-to-day work of project execution.
- Visitor Growth vs. Resident Sentiment: Navigating the disconnect between tourism promotion and the local community's understanding of economic impact and quality-of-life concerns.

Regional Governance
November 17th

Presenting Projects:

- ESSRP (Eastern Sierra Sustainable Recreation Partnership): MLTPA
- Regional Collaborative: ESCOG (Eastern Sierra Council of Governments)

High-Level Recap:

- The primary function of the entity is relational and network driven, focused on breaking silos to facilitate conversations and foster genuine connections across sectors and geographies.
- The regional entity should be developed from the ground level, highlighting the uniqueness of each community, and should avoid imposition from outside entities.
- This entity should prioritize implementation and funding of projects, highlight common issues and advocacy across the region, and provide guidance and expertise to expedite projects and navigate barriers.

Key Functions // Action Bias of Regional Entity:

- Action Over Planning: Focus on implementation & funding of projects.
- Unified Advocacy: Focusing on common issues and advocacy across the seven counties.
- Technical Assistance: Expertise and guidance to expedite projects and navigate barriers.
- Environmental Anchor: Centralized commitment to preserve natural resources.

Top Five Immediate Priorities for a Regional Entity:

- Secure Funding Sources
- Asset Mapping & Needs Assessment
- Relationship Building & Information Sharing
- Define Tribal Engagement Protocol
- Establish Project Prioritization Method

Tensions the Regional Entity Must Address:

- Control vs. Coordination: Frame the entity as a Regional Service Layer that enables local action, rather than mandating it.
- Speed vs. Deliberation: Focus on "Quick Wins" and ensure follow-through on projects to build momentum while the foundational structure is allowed to evolve informally.

Sierra Jobs First: Catalyst Projects - Recreation & Tourism

SIERRA JOBS FIRST CATALYST PROJECTS

In March, 2025, the Governing Council [finalized its vote](#) approving 40 projects that best fit the pre-implementation, planning-phase criteria for Catalyst funding under California Jobs First, and with the most potential to align with the [Regional Strategic Plan](#) to grow climate-resilient, equitable jobs in Alpine, Amador, Calaveras, Inyo, Mariposa, Mono, and Tuolumne Counties.

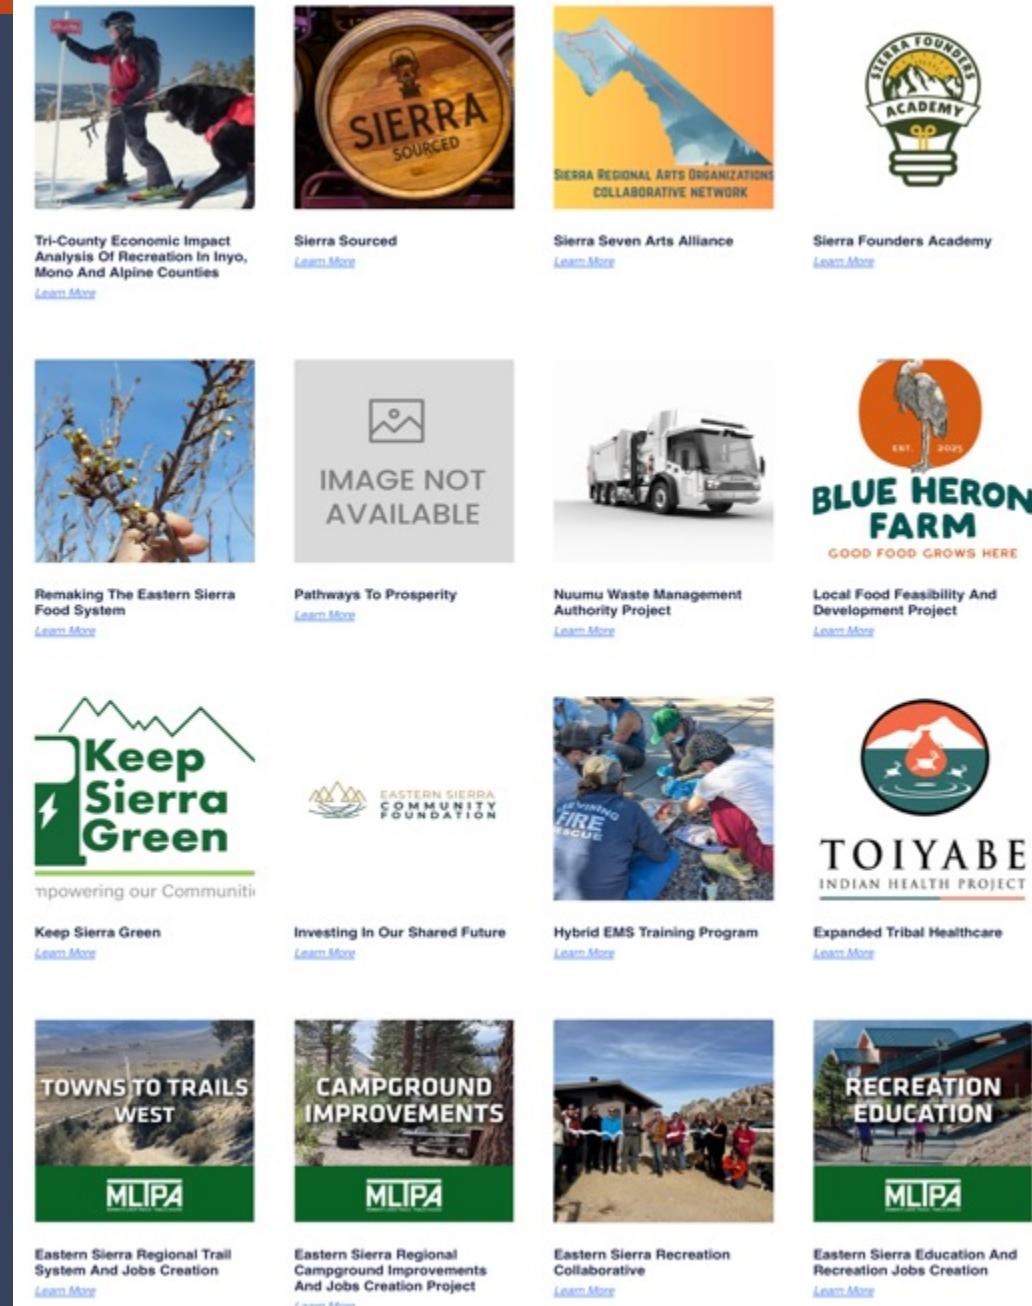

These projects were selected from 47 project applications that were received during the three-month RFP period and reviewed over 600+ people-hours, assessing each project's alignment with the Regional Strategic Plan and state Catalyst criteria.

The contract period to expend the funds began April 1, 2025 and ends September 30, 2026, during which time the projects will receive practical and technical support from the Sierra Jobs First team and Industry Sector Coordinators to ensure they have the maximum positive impact on the Sierra region for generations to come.

We are honored to share their journeys with you here, and hope you'll help spread the word!

Note: Projects are being added to this archive as contracting and information is finalized. For a PDF listing all projects contracted to date, click the button below.

Q

CALED Rural Economic Development Exchange

In May of 2018, the CALED Board approved the creation of a Rural Economic Development Exchange that allows CALED to direct some resources to support our efforts to help rural economic developers connect, share resources, and engage in policy conversations/initiatives. Specifically, CALED is committed to:

Exchange Goals:

- Convene rural economic development stakeholders at least one time per year (outside of CALED's Annual Conference)
- Include a Rural Exchange opportunity at the conference for resource providers to share updates on how they can support rural economic development as well as showcase best practices
- Work with USDA Rural Development in California to identify ways CALED can support their priorities and promote their work/grants.
- Share what we learn with partners that may be in a position to assist in addressing priorities, challenges, solutions, and resources to grow rural economies

If you haven't seen it yet, make sure to check out the [California Rural Infrastructure Finance Guidebook](#).

Webinar Wednesdays

CALED's Webinar Wednesday is free for our members. For non-members the cost is \$85.00 per webinar. All CALED webinar's will be held from

Community Survey Local Food (Inyo & Mono Counties)

We invite you to share your insights on local food purchasing habits, motivations, and challenges.

Your valuable responses will inform the Eastern Sierra Agriculture Activation Plan and will help our local producers improve access to fresh, delicious, and sustainable food in our region. By participating, you contribute to strengthening our community and supporting the farmers, ranchers, and artisans who play a vital role in our local economy.

In this survey, "local food" refers to products grown, raised, or crafted within Inyo and Mono Counties.

Thank you for taking the time to help us support a thriving local food system!

Estimated time: ~5-8 minutes

Your answers are confidential. You will be notified via email if you are a recipient of the \$50 gift card.
