

EASTERN SIERRA CAMPGROUND IMPROVEMENTS

PLEASANT VALLEY CAMPGROUND

INYO COUNTY, CA

In September 2025, Inyo County identified PVCG as an “emergency” project addition. The SJF project was well-positioned to alleviate Inyo County capacity constraints and pivot resources to prepare PVCG surveys and renderings for public input and funding requests.

NUMBER OF CAMPSITES: 75

OPEN: Year-round

NEARBY: World class fishing & climbing

GATEWAY COMMUNITY: Bishop, CA

LAND MANAGER: Inyo County

PRIMARY ISSUES:

- Erosion from river spreading dangerously close to roads, campsites, and other infrastructure.
- Lack of shade makes this campground almost unusable in the summer.
- Campsites too close to water cause damage to fragile ecosystems, block wildlife, and can lead to safety and pollution issues.

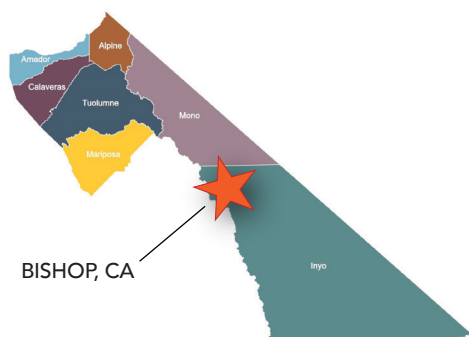

PHASE:

- Completed through schematic design and provided conceptual renderings to assist with the next phase.

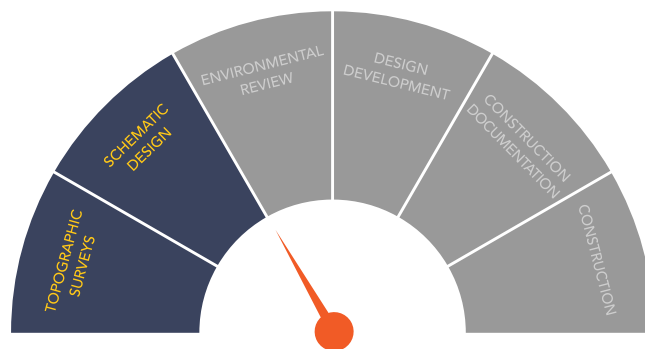

NEXT STEPS:

- Streambank stabilization
- Inyo County Board of Supervisors and public review
- Environmental and Tribal reviews
- Secure funding

“Thank you so much – these are incredible! What most excites me about this is the ability to take these renderings to our board and to the public and show them what we can do with some concerted effort and a little investment!”

– Meaghan McCamman Ostrander,
Deputy County Administrative Officer County of Inyo

As of September 30, 2026
